# Bringing Professional Audio and Video Together

Welcome to the Roland Professional Audio and Video Equipment catalog.

Roland has introduced many innovative products to the professional market over the past few years and has built a strong trust across many users and installations around the world. Through continuous development and a clear focus on professional audio/video products, Roland Systems Group is committed to providing unique solutions to improve workflow and maximize creative possibilities.

We offer solutions to many markets including: Broadcast • Education • Legal • Live Production • Sports • Theater • Theme Park • Videography • Visual Performance • Worship.

# V-Mixing System

## Configure a system for any venue or application The V-Mixing System - an advanced mixing environment

It's not simply a digital version of an analog console. The V-Mixing System is the next generation mixing "ecosystem" that exploits the advantages of digital technology. It separates mixing (V-Mixer) from the input/output section (Digital Snake) enabling pure sound, minimal loss of transmission with very flexible system configuration and setup. It allows effortless additions for monitoring solutions (M-48 Personal Mixer) as well as multi-channel live recording (SONAR REAC Recording System and R-1000 48-Track Recorder/Player). The V-Mixing System brings together the predominant components of the live sound environment, expanding the possibilities and benefits far beyond the sum of its parts.

### REAC

## High quality sound is obtained with ease and flexibility REAC - advanced audio transfer technology

REAC (Roland Ethernet Audio Communication) technology is the cornerstone of the V-Mixing System. REAC is Roland's original technology for low latency, high quality digital audio transfer. REAC is an Ethernet based technology that enables multiple components to be easily integrated using lightweight Cat5e/6 cable. With just a single inexpensive cable, 40 input x 40 output channels of 24-bit uncompressed audio data (including level and control information) are transferred.

### Digital Snakes

Enjoy superior clear sound, great intelligibility with minimum latency and the freedom to split or extend your audio sources anywhere.

Digital Snake

### Bridging

The S-MADI REAC Bridge enables connectivity between MADI-equipped digital audio mixers/systems to any REAC-based devices.

S-MADI  
REAC MADI BRIDGE

### Personal Mixers

The M-48 is the "next generation" live personal mixer that offers musicians the flexibility to control exactly what they want to listen to during their performances.

M-48  
LIVE PERSONAL MIXER

### Digital Consoles

Available with a variety of digital snake configurations, this fully featured digital solution is ideal for any mid-sized live event applications in corporate, church, school or rental/staging environments.

### Recording

Multi-channel recording and playback is accomplished with reliability and stability using the dedicated R-1000 48-Track Recorder/Player.

## How to Configure a V-Mixing System

**Step 1**  
**Decide on inputs/outputs**

There are a number of I/O configuration choices. Select based on size, I/O count, and modularity.

S-0808    S-1608    S-4000S

Determine if you need additional splits for monitoring, recording or distribution to multiple places. You can also distribute your main I/O units together into a merged REAC signal.

S-4000D    S-4000M

**Step 2**  
**Choose a Console**

There are four choices of consoles to choose from. Differences center around:

- Mixing Channels
- Processing Power
- Number of Faders
- Size and rackmount ability

M-480    M-380  
 M-300    M-200i

**Step 3**  
**Choose Monitoring Solution**

Monitoring needs can be addressed by adding the M-48 Personal Mixing option, another V-Mixer as a monitor console, or the combination of both.

The M-48 offers musicians the flexibility to control exactly what they want to listen to during their performance.

M-48

Add an additional V-Mixer to create a monitor position that can control wedges and/or any M-48 personal mixers connected taking the burden off of the FOH position.

M-300

**Step 4**  
**Choose Recording/ Playback Solution**

Multi-channel recording and playback can be added by using a simple Cat5e/6 cable from a split point.

Record/play back up to 48-channels of audio using the Roland R-1000 Multi-Channel Recorder/Player.

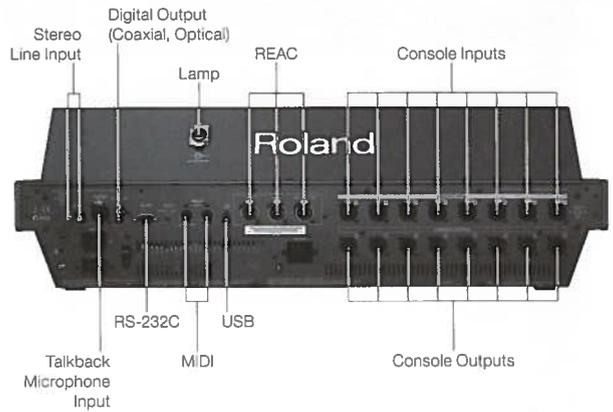

R-1000

Capture up to 40-channels of audio to a computer using the SONAR REAC Recording solution.

# V-Mixer M-480 | Live Mixing Console

Flagship console with a new world-class powerful mixing engine

- 48 mixing channels plus 6 stereo returns for a total of 60 channels
- Main (LCR) outputs, 16 AUX buses, 8 matrices
- Configurable to 90 inputs and 90 outputs depending on Digital Snake configuration
- 4-band advanced parametric EQ, and delays on all inputs and outputs
- Compressors and Gates on all mixing channels
- Six built-in stereo (dual-mono) multi-effects and twelve graphic EQs (switchable to 8-band PEQs)

- 214 possible output patch points on each port (A,B, console), allows direct routing from preamp to output point without having to use mix channel
- Supports integration with Personal Mixing System and Multi-Channel Live Recording/Playback
- Cascade connection supports large format applications for 96 mixing channels
- Remote control from the dedicated iPad application, M-480 Remote

The large, bright 800 x 480 color LCD gives a very clear view of all the V-Mixer's parameters

● Channel Display

Channel Editing Display is a familiar and easy-to-use analog-style layout of all common channel parameters.

● Channel EQ

Dedicated screen for editing channel EQ. Change values quickly using the dedicated knobs.

● EFFECTS

View and edit the 6 stereo (dual mono), high-quality FX for channel/bus inserts such as reverb, delay, channel strip.

● GEQ/PEQ

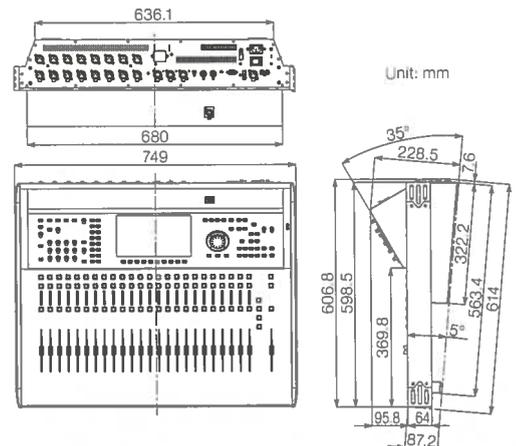

Setup screen for twelve 31-band Graphic EQs or 8-band Parametric EQs.

### RS-232 Control

System integrators are able to create control interfaces for the M-380 V-Mixer from industry standard system control touch panels by harnessing the power of the RS-232 connection on the M-380. Users can recall scenes, adjust volume levels, mute channels or groups and control dozens of other mixing parameters. The M-380 can be discreetly installed in a hidden rack with all control happening from the interface designed by the system integrator.

Installed Sound - Standard V-Mixing System - 42 Inputs/26 Outputs

Standard System consists of two S-1608 Digital Snakes on stage.

# A powerful and compact digital mixing console

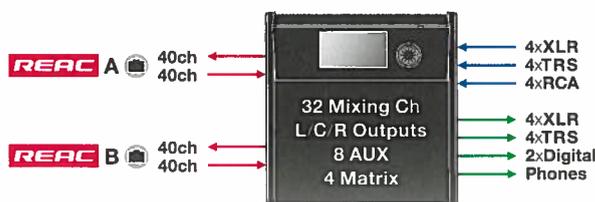

Headphone Jack

- 32 mixing channels, L/C/R outputs, 8 AUX buses, 4 Matrices
- Built-in REAC ports allows flexible system expansion
- 4-band PEQ and dynamics on all channels
- 11 different built-in multi-effects/ PEQ and delay on all outputs
- 100 mm motorized faders
- 24bit AD/DA for high-quality sound remotely controllable from a PC
- Record to /playback from USB flash memory
- Perfectly integrates with the Digital Snake for simple and high-quality audio transmission, distribution, splits and merging
- Construct a flexible and powerful system by adding the Personal Mixing System, multi-channel recording and other REAC components

### Two built-in REAC ports allows flexible system configuration

### V-Mixer series - Control Features and Options

#### ●Control remotely from your computer

V-Mixers can be controlled remotely in real-time from a PC (Windows/Mac) connected via the USB port. Mixing functions can be operated directly from a PC by using the RCS dedicated control software which has the same interface as the V-Mixer color display. (The RCS for the specific V-Mixer can be downloaded from the Roland Systems Group website.) The RCS can also be operated in offline mode, allowing data for various settings to be created in advance and saved to a USB memory drive. When you get to the venue, load the settings and jump right into sound check and rehearsal.

#### ●V-LINK - Audio and Visual Solution

By connecting the MIDI input/output to the video switcher such as the V-1600HD, V-LINK automatically synchronizes the audio of the V-Mixer with the visual images allowing "audio follows video".

#### ●Control remotely using a wireless LAN

By enabling VNC or Remote Desktop Connection on a local computer directly connected to the V-Mixer via USB, the console can be controlled remotely from another PC or tablet using a wireless LAN. For example, you can walk around the venue listening in various locations adjusting the house mix appropriately, or stand onstage to adjust the monitor mix while consulting the stage performer.

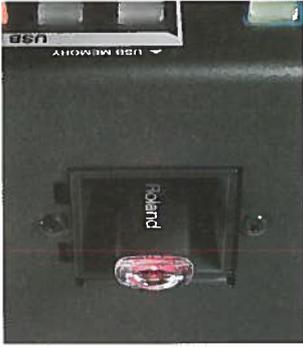

#### ●Multi-channel recording

Forty channels of 24-bit audio can be recorded directly to a PC (Windows) by connecting a REAC port to the gigabit Ethernet port on the PC via a single Cat5e/6 cable. Audio is recorded as individual WAV files using Cakewalk SONAR\* and can be mixed after recording using the powerful digital audio tools and effects in SONAR. Alternatively you can use the new R-1000 48-Track Recorder/Player to record or playback multi-channel audio.

\* To use this feature, the REAC driver is required in addition to SONAR.

USB memory recorder/player

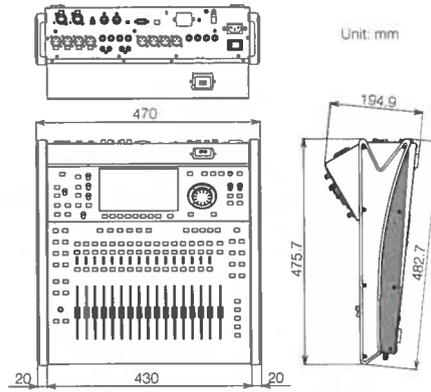

Record the output of the V-Mixer Main, assigned AUX bus or MATRIX bus directly to a USB memory drive connected to the built-in USB port. A mix produced with the V-Mixer is saved as an uncompressed WAV file, without the need for an external recorder. WAV files on the USB memory drive can also be played back on the V-Mixer and used for pre/post show music or background music/tracks. User settings and mixer data can also be saved to a USB memory drive. The USB recording function is available on all V-Mixer Consoles.

# V-Mixer M-200i | Live Mixing Console

## Comprehensive iPad Control Meets Professional Mixing Console

**NEW**

\* iPad not included

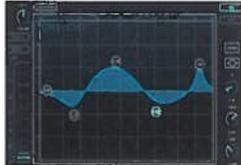

- 32 Channel Mixer with Moving Faders
- 4 Band PEQ/Comp & Gate (with Key-in Filter) per channel
- 8 AUX/4 Matrices - with EQ, Dynamics & Delay
- 8 DCAs/4 Mute Groups
- 4 Stereo Effects/4 GEQ (31 Band)
- 24 Analog Inputs, 12 Analog Outputs and Stereo Digital Output (AES/EBU)
- REAC Expandable
- 19" Rackmount Compatible

### M-200i Remote - M-200i Remote Control Application for the iPad

#### ● Channel Strip

#### ● Channel EQ

#### ● Channel Edit

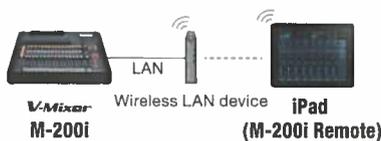

By simply installing the dedicated application, "M-200i Remote", you can control all key M-200i features from an iPad. Channel strips, channel EQ, channel dynamics, AUX SENDs, Scenes and other functions can be easily accessed. Use a simple swipe to move between channels. Make your faders longer for even more precise control. Visually drag, pinch or stretch EQ curves on a large screen.

\* The M-200i Remote will be available on the App Store in the 1Q of 2013.

### Three types of wireless connections

The M-200i and an iPad can be connected wirelessly by attaching the "WNA1100-RL" (sold separately) dedicated wireless USB adapter or connecting with a wireless LAN device directly.

#### ● Cable LAN connection

#### ● Wireless LAN connection

#### ● Ad-Hoc connection

■ SI-AD4 - 4-Channel Analog Input Module provides high quality pre-amps on each input channel with phantom power

■ SO-DA4 - 4-Channel Analog Output Module provides high quality D/A converter

■ SI-AES4 - 4-Channel Digital Input Module allows input of up to 96 kHz AES/EBU signal using the built-in sampling rate converter  
 \* No support for double wire

■ SO-AES4 - 4-Channel Digital Output Module allows output of up to 96 kHz AES/EBU signal using the built-in sampling rate converter, and also supports synchronization with an external word clock  
 \* No support for double wire

■ S-240P supplies redundant DC power to an S-4000S or S-4000H; Outputs DC 24 V 6 A power

\* S-4000S-MR can be customized in blocks of 8 channels when combined with the modules from the SI/SO series, which have both analog and digital I/O. Audio transmission and power supply redundancy is possible.

DIGITAL SNAKES | Roland  
**S-4000M** | REAC Merge Unit

Enables distributed input/output possibilities by merging up to four REAC devices

REAC

- Merge up to 4 REAC devices into a single REAC stream
- Power REAC devices supporting embedded power
- Automatically assign input channels using the Auto Map function
- Patch input and output assignments using S-4000RCS software or the V-Mixer
- Configure and power up to four S-0808 Digital Snakes for a 16 input x 16 output system

DIGITAL SNAKES | Roland

**S-OPT** | REAC Optical Converter

Enjoy long distance REAC audio transfer

REAC

- Converts multi-channel REAC signal to a digital optical signal
  - Up to 2 km distance transfer
  - Rugged, Neutrik® OpticalCon connectors provide highest possible system reliability
- \* Use Neutrik's Mobile Fiber Cable for optical single transfer.

DIGITAL SNAKES | Roland

**W100S-R** | REAC Cable

100 meter Cat5e Cable for REAC signal transmission on reel

REAC

- Crossover Ethernet cable with Neutrik® Ethercon connectors on both ends
- Compact and lightweight cable reel with SC-W100S cable pre-rolled

DIGITAL SNAKES | Roland  
**SC-W100S/SC-W20F** | REAC Cable

100/20 meter Cat5e Cable for REAC signal transmission

REAC

- Crossover Ethernet cable with Neutrik® Ethercon connectors on both ends

PERSONAL MIXERS | Roland

**S-4000D** | REAC Splitter and Power Distributor

A REAC Splitter that supplies audio and embedded power to M-48 or S-0808

2U

REAC

- Equipped with 10 REAC ports including 8 ports of REAC Embedded Power
- Automatic detection of a REAC products. Power is not supplied if the device is not compatible with REAC Embedded Power

PERSONAL MIXERS | Roland

**RH-PM5** | In-ear Monitors

Tuned and designed for stage and studio performance

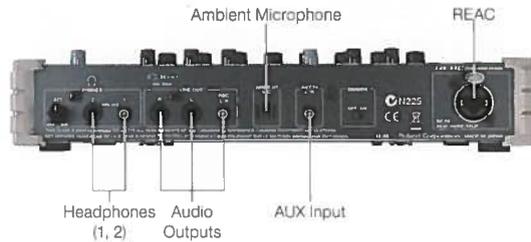

- High quality and detailed sound articulation for on-stage and studio monitoring
- Heavy duty aluminum construction to handle the rigors of stage usage
- 4 different types of ear adapters (S/M/L/XL) along with carrying case

# M-48

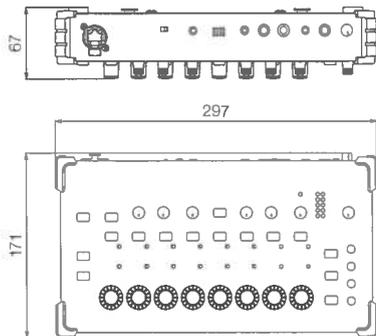

Live Personal Mixer

The “next generation” live personal mixer offers musicians the flexibility to control exactly what they want to listen to

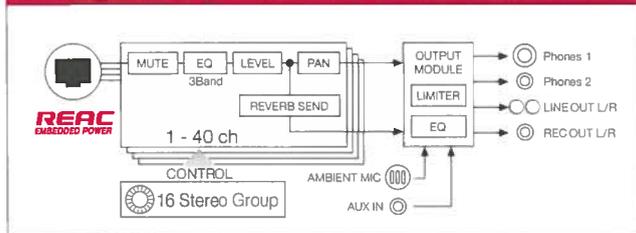

- Enables control of up to 40 audio channels via 16 stereo groups
- Provides the highest level of sound monitoring quality for both headphones and IEMs (In-ear Monitors) as well as for wedge and powered monitors
- Built-in ambient mic aids in communicating with other musicians as well as enabling a stage/room “presence”

- REAC Embedded Power transfers both power and 40 channels of audio to the M-48 via a single Cat5e/6 cable
- Volume, Pan, 3-band EQ and built-in Reverb per group – all instantly adjustable by convenient encoder knobs

Unit: mm

### M-48 Setup

- A complete Monitoring System with the V-Mixer  
The V-Mixer is equipped with all the remote management software, memory recall, providing a simple and flexible setup.

#### Setup Display

#### Source Assignment

- Connect to an existing Analog/Digital Console  
Connect M-48s to your existing console using a Digital Snake front-end or the S-MADI for MADI capable consoles.

Setup and manage the M-48 on PC using the S-4000RCS Remote Control Software when using with an existing console.

# R-1000 | 48-Track Recorder/Player

**Capture. Playback. Soundcheck. Rehearse.**  
**Ideally suited for many configurations and applications**

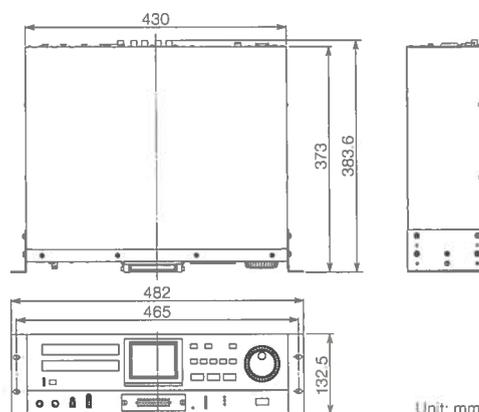

- Records up to 48 tracks of 24-bit audio in BWF (WAV format)
- Approximately 20 hours recording (44.1/48 kHz) using the removable 500GB HDD
- Removable HDD ensures smooth integration with any DAW such as SONAR
- Plays up to 48 tracks of 24-bit audio via REAC
- Easy and intuitive operation using Built-in LCD monitor, any V-Mixer or a PC/Mac with R-1000RCS software

**Option**

**HDD-500G**  
 HARD DISK DRIVE UNIT (500GB)  
 Dedicated removable hard disk drive for 20 hours recording (44.1/48kHz)

Other Software	Adobe Reader

SONAR REAC Recording System requirements are based on the system requirements for SONAR X1 Producer.

There are a number of other variables that may affect performance, including differences in hardware design, system configuration and overall combination of software applications that are installed.

\*1: REAC Driver version 1.3.1 provides legacy support for Edrol FA-66 and Cakewalk SPS-66 hardware units.

\*2: System components will vary depending on your V-Mixing System configuration.

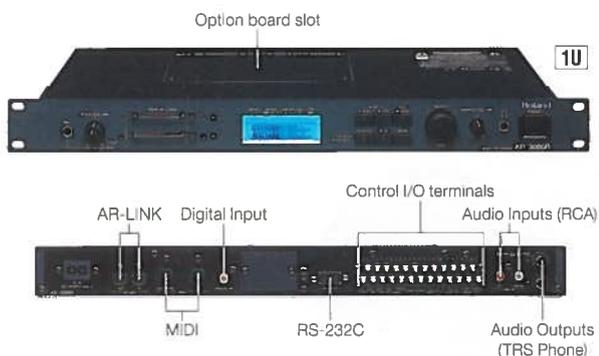

\*3: REAC Driver version 1.3.1 does not provide legacy support for SONAR 7 Producer and SONAR 8 Producer.

# V-1600HD | Multi-Format Video Switcher

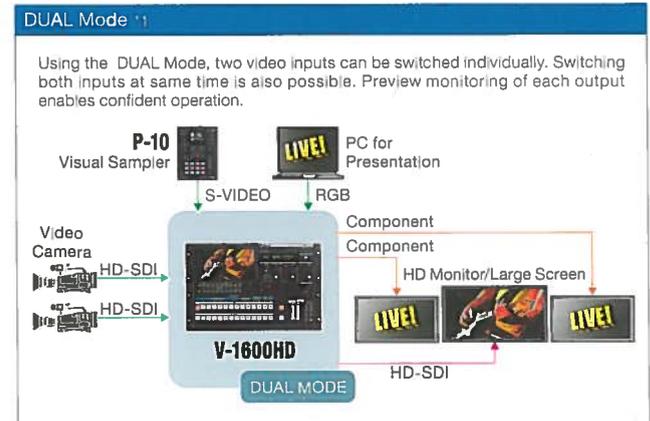

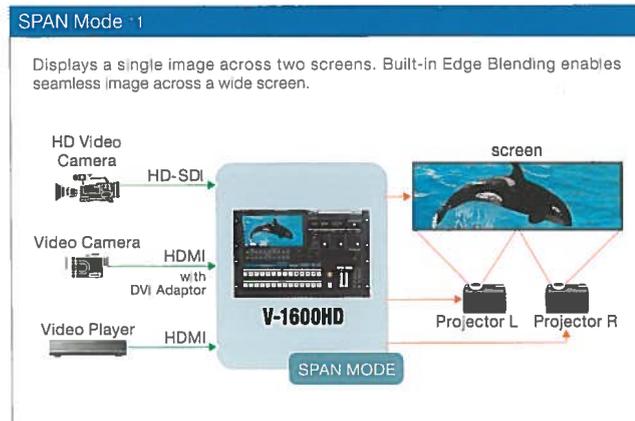

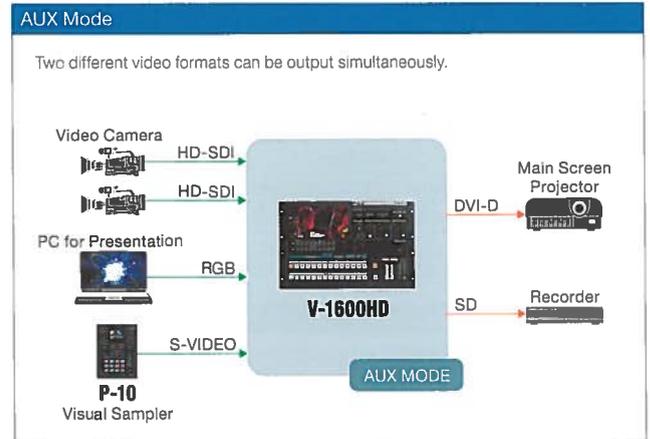

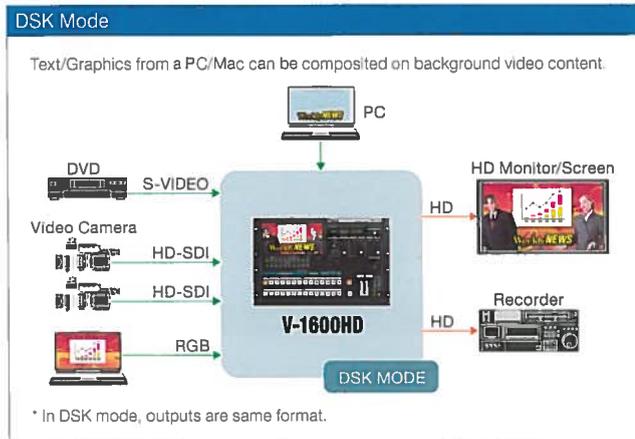

## An all-in-one multi-format live video switcher

- All-in-one 14 channel (16 Input) seamless switcher/mixer
- Ready to connect anything: SDI, DVI/HDMI, RGB, Component, S-Video, Composite
- Built-in high-res preview monitor, frame synchronizer and scalers
- Independent multi-format outputs including edge-blending

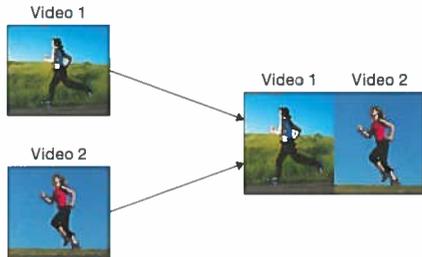

- Downstream Keyer, Composite Keyer and Picture-in-Picture
- SPAN, DUAL and SPLIT modes offer a variety of output configurations
- Use one camera to create multiple perspectives for virtual multi-camera production

\*1: In SPAN/DUAL/SPLIT Mode, PinP, Key, DSK, External Control are not available. Transition effects cannot be applied. When [CUT] is selected, a black screen is inserted momentarily at the time of transition. When [MIX] is selected, a black screen is inserted and a fade-in or fade-out occurs.

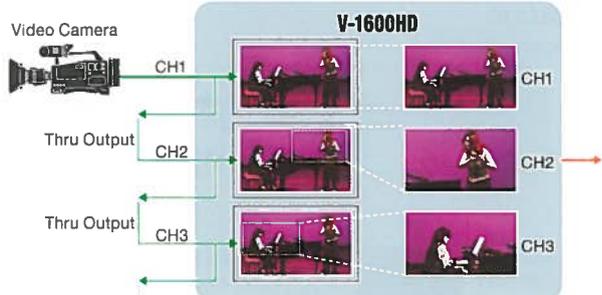

**SPLIT Mode**

Using SPLIT Mode, two video inputs can be displayed on one display. This is useful for comparing two videos on a single screen.

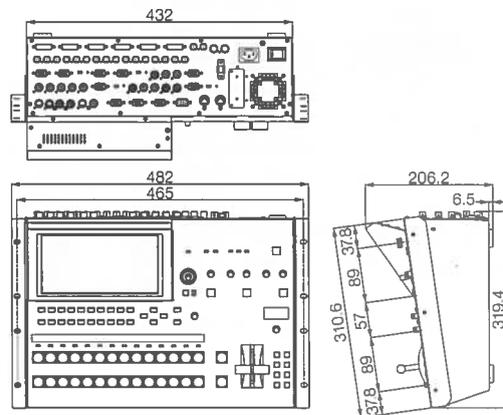

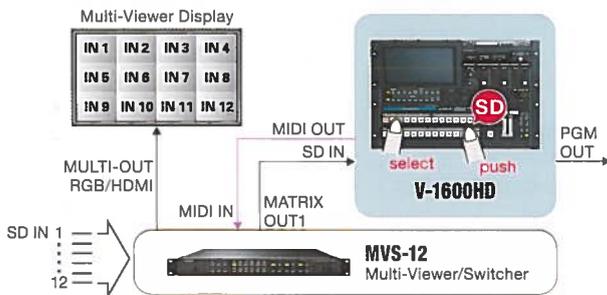

**Multi-Zoom**

Using the thru out connectors, one video input can be daisy-chained to multiple inputs. The scaler for each input can zoom into any position in the video image enabling a virtual multi-camera environment. This gives the appearance that you have additional cameras.

**Expansion of SD Inputs**

The Matrix Switcher function enables the V-1600HD mixer to access additional SD inputs. By connecting a MIDI cable and using the V-LINK function, the V-1600HD can directly select any video source from the MVS-12.

\* This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.  
\* This product is intended for use in the following Electromagnetic environments: E1:residential, E2:commercial and light industrial, E3:urban outdoors, E4:controlled EMC environment, ex. recording studio (broadcasting studio) which are specified in EN55103-1 and EN55103-2.

### Multi-Zoom

Using the shared input function, you can assign the video on channel 1 to channels 2 through 4 and the video on channel 5 to channels 6 through 8. The scaler for each input can zoom into any position in the video image enabling a virtual multi-camera environment. This gives the appearance that you have additional cameras connected.

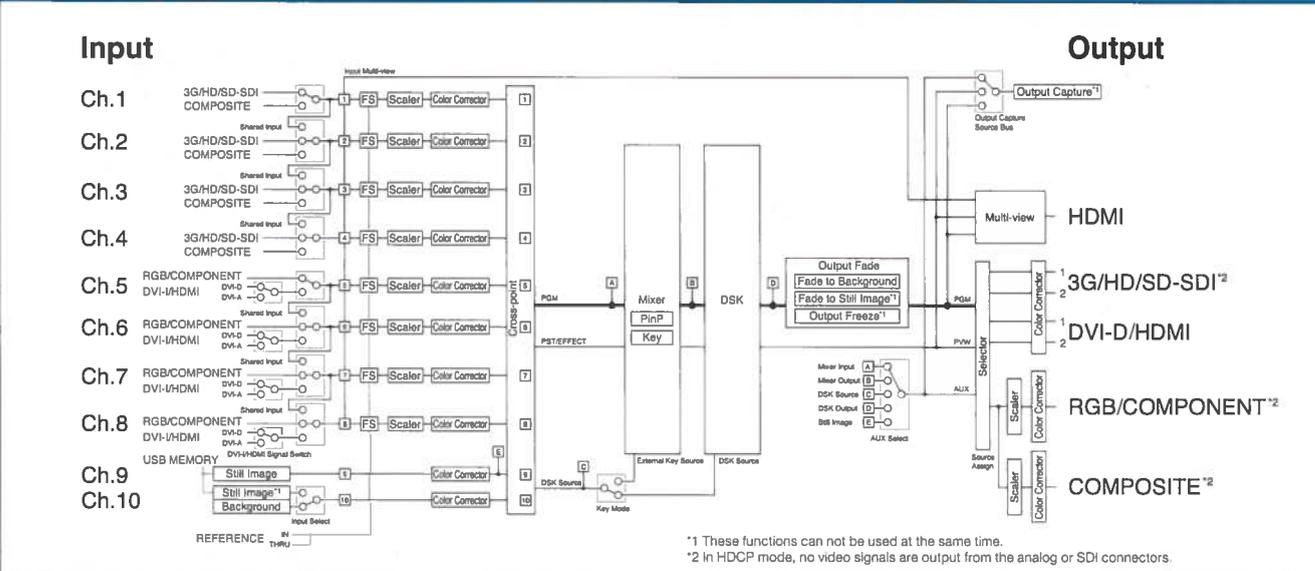

\* Only the source of the previous adjacent channel can be shared.

## Seamless mixing and scaling of multi-format SD/HD/RGB video signals

### V-440HD

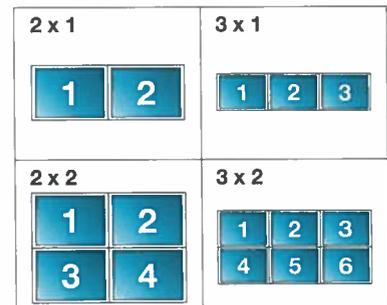

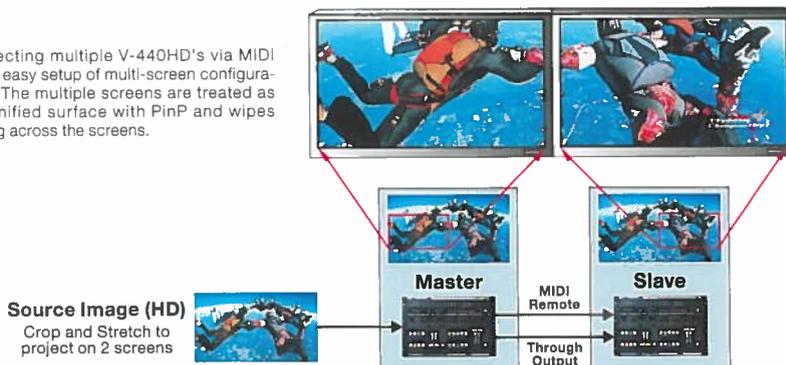

### V-44SW

- Mix SD video, HD video and RGB signals from computers
- Selectable output formats; 1080i or 720p for HDTV or RGB for computer display with built-in scaling
- Simple and intuitive operation
- Dissolve/Wipe transitions, PinP, SD/HD Key compositions
- With thru outputs and MIDI sync, multiple units can be connected for output to multiple screens (video walls)
- Remote control using RS-232C, V-LINK/MIDI
- Panel Preset function up to 15 memory settings
- Control the audio input level of the V-Mixer live mixing consoles using V-LINK
- Tally Output Terminal (V-440HD Only)

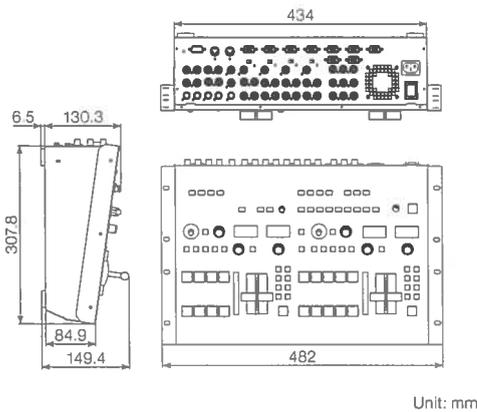

### Output to multiple screens

Connecting multiple V-440HD's via MIDI allows easy setup of multi-screen configurations. The multiple screens are treated as one unified surface with PinP and wipes moving across the screens.

Multi-Format Video Switcher

## Four Multi-Format Channels at the Pinnacle of HD Picture Quality

**NEW**

### INPUT

#### SCALING

##### Zoom and Adjustment.

The V-40HD features scalars that let you make settings independently for every input source. With these, you can take input sources of different resolutions and adjust to any sizing.

#### INPUT Selectors

Select from among HDMI, RGB/Component, and Composite as the connector for each input.

With just one touch, you can access the video source from any of the three pieces of equipment connected to the respective inputs.

#### PinP

Two images can be combined into one video image.

You can select any of four positions for an inset screen: top left, bottom left, top right, or bottom right. You can also freely adjust the size of the inset screen.

#### MEMORY

25 (5 x 5) Memory Presets

### OUTPUT

#### OUTPUT Selectors

Three types of output formats to choose from.

Select SD, HD, or RGB simply by pressing a button.

Default Settings (can be changed)

SD	480i
HD	1080i
RGB	XGA (1024 x 768)

\* You can select other format on the menu.

\* The format of PVW OUT cannot be changed (1920 x 1080/60Hz fixed)

#### PVW (Preview) Selectors

Chooses the view displayed on a preview monitor.

Select a four-way split screen, PST, PGM or DSK to display.

\* The resolution and refresh rate of monitor output is fixed at 1920 x 1080/60 Hz (progressive)

\* Use an HDMI monitor that supports HDCP and 60p signals.

\* When INPUT is selected (four-way split), the sources are displayed using a reduced frame rate.

#### WIPE PATTERN

Easy selection of video transition effects.

#### DSK (Downstream Keyer)

Composite logos and text into output video.

You can overlay logos and text onto composited and switched video. Scene transitions underneath logos or text that remain displayed is possible.

#### VIDEO FADER

Switch the sources at the speed you want.

Using the video fader (T-bar) lets you carry out scene transitions, fade-ins, and fade-outs manually at exactly the speed you want.

#### INPUT Connectors 1 - 4

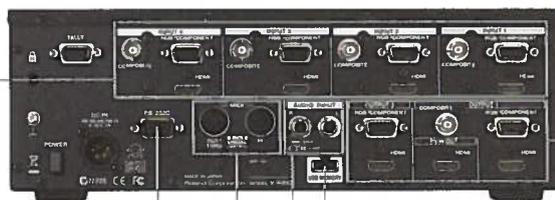

Support for three formats per input.

[HDMI] Up to WUXGA, 1080p

[RGB/Component] Up to WUXGA, 1080p

[Composite] 480i or 576i

HDMI inputs support an embedded audio signal.

#### CONTROL INTERFACE

[RS-232C]

Use RS-232C for integrated remote control.

It's possible to connect a computer, wall panel or other remote device and use it to control switching, effects, and other operations.

[MIDI]

Controllable the V-40HD via any MIDI device.

A Roland digital audio mixer like the M-200i V-Mixer can link to the V-40HD for audio-follows-video application. Connect another V-40HD for more inputs.

#### AUDIO INPUT

Mix analog audio into HDMI video.

The V-40HD is equipped with inputs for analog audio equipment. This enables you to embed analog audio in the HDMI video output.

#### Output Connectors

Connect monitors, projectors, or recording equipment.

[HDMI] Up to WUXGA, 1080p

[RGB/Component] Up to WUXGA, 1080p

[Composite] 480i or 576i

\* In HDCP mode, no video signals are output from the RGB/Component and composite connectors.

#### USB PORT

For saving the internal memory.

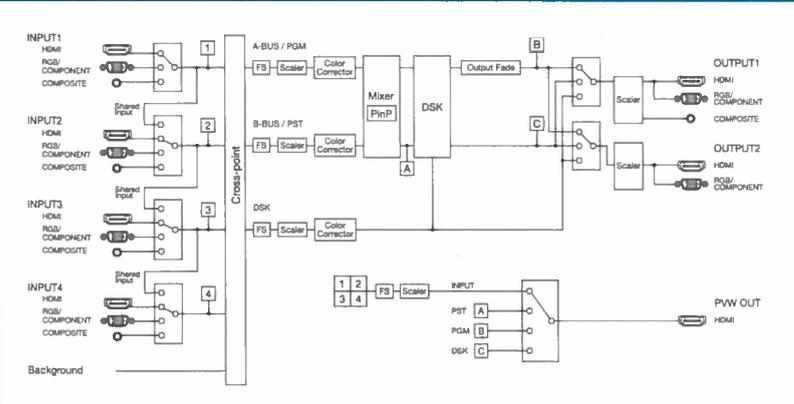

This lets you connect a USB flash drive and save the internal memory to it.

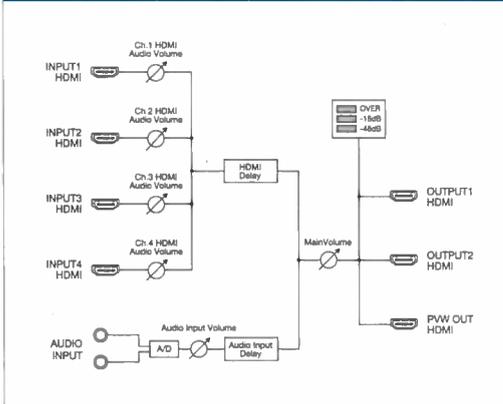

- 4 Inputs (HDMI/RGB/Component)
- 3 Outputs (HDMI/RGB/Component/Composite + HDMI/RGB/Component + HDMI)
- 4:4:4/10-bit Internal Processing (\* 4:2:2/8-bit Output Processing)
- 1 M/E (PinP) + DSK
- Built-in frame synchronizers and scalars on all inputs
- Input status LEDs

- Full HDCP support
- Preview monitor output (Four-way split screen for Inputs, PST, PGM, or DSK)
- Audio embedding
- Up to 12 frames audio delay to align the timing with video for perfect lip sync

Block Diagram (Audio)

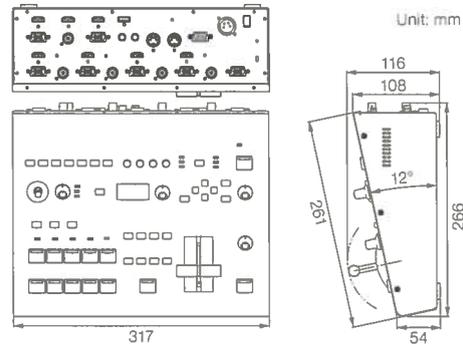

Multi-Zoom

Using the shared input function, you can assign the video on channel 1 to channels 2 through 4. The scaler for each input can zoom into any position in the video image enabling a virtual multi-camera environment. This gives the appearance that you have additional cameras connected.

\* Only the source of the previous adjacent channel can be shared.

# LVS-800 | Video Mix/Live Switcher

## Innovative 8-channel video mixer with DSK (Downstream Keyer) and Two separate PC/RGB inputs

V-LINK

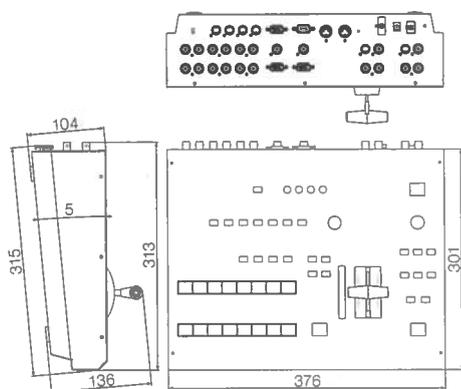

A/B Mix  
DSK  
(Downstream Keyer: Composition Function)

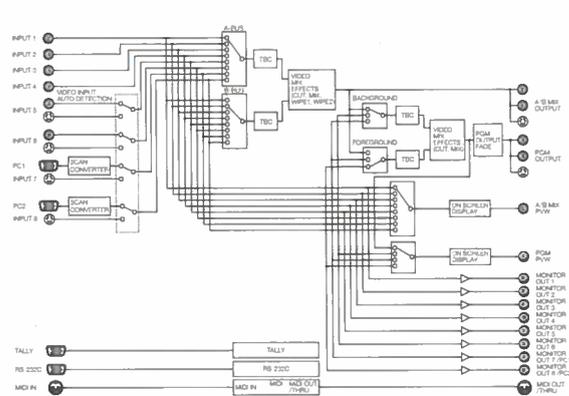

- 8 video inputs and 2 independent outputs for multi-screen applications
- Downstream keyer for seamless mixing under title/graphics
- Two PC/RGB inputs for mixing between computer sources

- Panel Presets for instant recall of mixer configurations
- Remote control using RS-232C, V-LINK/MIDI
- Equipped with Tally Outputs

Unit: mm

8-Channel Video Mixer

## Powerful Eight Input Video Mixer with Two PC/RGB Inputs

- 8 video inputs including built-in scan converter for RGB input
- High image quality 4:2:2 full-frame digital processing
- Support for RGB input (VGA to UXGA)
- Luminance key, chroma key enables logos or text from computer to be overlaid over background video
- Over 260 patterns of various transitions including Mix, Wipe, Key, Slide, Stretch etc.

- Equipped with 25 categories/150 patterns of video effects such as colorize, negative, feedback, after image etc.
- Picture in Picture, Luminance Key and Chroma key are available for compositing videos
- Independent monitor outs for each video input
- V-LINK control enabling audio-follows video with V-Mixers

 | 4-Channel Video Mixer

Four HDMI input video mixer with built-in multiviewer and USB port for streaming

**NEW**

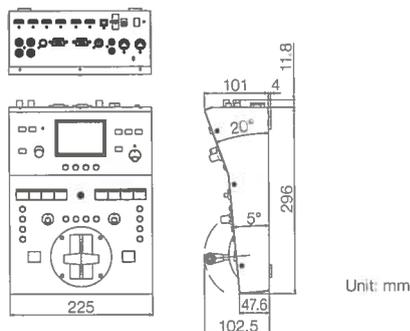

**HDCP**

**AUDIO EMBEDDING**

**MIDI VISUAL CONTROL**

**V-LINK**

- Built-in Color LCD Touch Multiviewer
- 3 Inputs (HDMI/Composite) + 1 Input (Up to 1080p HDMI/RGB/Component/Composite)
- 3 PGM Output (HDMI + RGB/Component + Composite)
- PVW Output (PVW/Multiviewer)
- Built-in frame synchronizers on all inputs
- Selected Transition and Effect patterns from V-8
- Audio embedding and delay
- Streaming Output (USB AUDIO/USB VIDEO)

 | 4-Channel Video Mixer

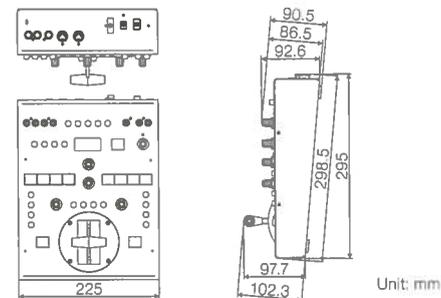

Four input video mixer with many high quality video effects

**V-LINK**

MIDI (Out/Thru, In) Video Inputs

- Designed as visual performance mixer
- 4 inputs and 3 outputs enabling switching, mixing and compositing of any two inputs
- DV quality images with clean digital processing
- Independent 2 channel TBC enables smooth mixing/switching
- More than 90 types of effects and more than 240 types of wipe patterns
- BPM Sync to match visuals to the beat of the music
- V-LINK/MIDI provides synchronization with sound

# MVS-12 | Multi-Viewer/Switcher

## Multi-viewer for convenient video monitoring with simple matrix switcher

- Groups and displays up to 12 SD video signals to a single HD or RGB monitor
- Matrix switcher function enables ability to assign 12 inputs to 4 different outputs
- Four setups can be stored and recalled
- Controllable via Ethernet, RS-232C and MIDI
- Displays channel selection on monitor using V-LINK

### 4 Multi-Viewer Layouts

#### ● 12 Screen Layout

#### ● 10 Screen Layout

#### ● 9 Screen Layout

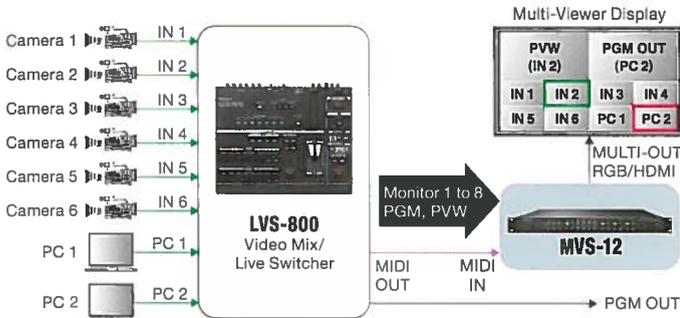

#### ● 4 Screen Layout

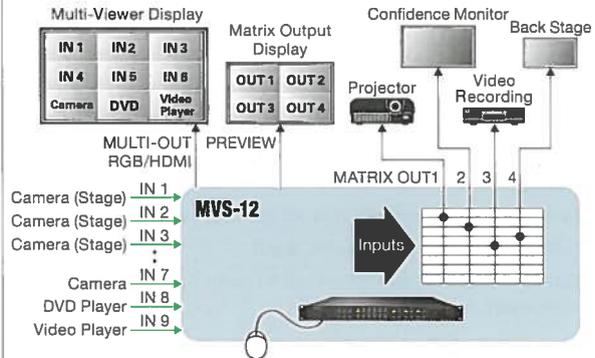

### Multi-viewer and Matrix switcher function enables system expansion

#### ● Monitoring for Switcher

The MVS-12 is a perfect companion for the LVS-800 allowing you to preview all monitor outputs. Using a MIDI connection the PGM/PVM video source is displayed and indicated by a red frame and green frame (tally).

#### ● Monitoring for Video Installation

Video sources can be distributed to up to four different locations.

# VR-5 | AV Mixer & Recorder

## All-in-one AV Mixer for stand-alone recording and live streaming

**USB Port ready for Live Streaming** \* The world's first USB Video/Audio Class supported AV mixer. Simply connect like a Web camera to enable easy live streaming. \*Our research at time of printing

### MONITOR

**Intuitive operation with Dual Touch Monitors**

Select the input source by touching the quad view layout display. Menu parameters are easily accessed and set.

### PC INPUT

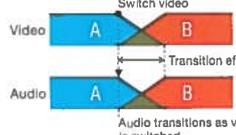

**Audio and video from a PC**  
RGB input and stereo mini Audio input

### AUDIO MIXER

**Full digital audio mixing**

Audio Follow function

### VIDEO/PC SELECT

**Video switching with a single touch of a button**

### VIDEO/AUDIO OUTPUT

### RECORDER

**Record to SD memory card**

Supports SD and SDHC memory cards.

Note: Video can not be played back when recording.

### VR-5 Image Converter (Win/Mac)

Software for preparing data to be played back from the VR-5 is available from the Roland Systems Group website.

Supported Formats:  
AVI, MPG, MOV, WMV, MP4, DV

### KEYER

**Control transparency with a single knob**

Chroma Key Composite a person over a background. Luminance Key Composite text over a background.

### VIDEO EFFECTS

#### Simple video compositing

Transition between sources with various switching effects

SPLIT displays two video sources simultaneously

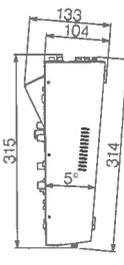

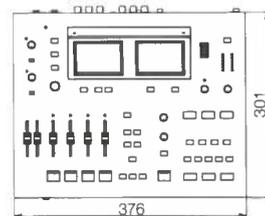

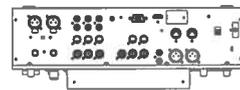

PinP inlays a small window in the main source

- 5-Channel Video Switcher (3 video sources, PC input, video playback)
- 2 Mono and 5 Stereo Mixable Audio Channels
- Built-in scan converter for PC input
- Built-in dual LCD monitors with touch control for easy video source selection

- Three video layers for 2 video sources plus DSK (downstream keyer)
- Video player/recorder
- USB video/audio class device for web streaming

## Portable Audio and Video Mixer with USB port Ready for Live Streaming

### Live Production

**Live stage production using a projector or display.**

Show computer image as main display or use the composite out for mixed image.

### Live Streaming

**USB video/audio class device for webstreaming or recording with a PC/Mac.**

Stream the event (visuals and audio) to the internet by connecting to a computer via USB and linking to a live streaming service.

### VIDEO

#### VIDEO SELECT

**Built-in LCD monitor with touch control for easy video source and menu selection.**

You can monitor four inputs and the output. Monitor can be used to view a quad display of inputs, program out or combination quad view with program out. When the [INPUT] button and [OUTPUT] button are pressed simultaneously, the output picture is overlaid on a four-way split screen of the input.

VIDEO INPUT [4] switchable between Composite or PC. A built-in scan converter is available for the PC input to allow it to be mixed with the other video sources. A PC thru jack is also included enabling direct connection to a projector or display with no reduction in resolution.

### AUDIO

#### AUDIO MIXER

**Hands-on mixing for live performance and production.**

4 Mono (XLR or 1/4") and 2 stereo mixable audio channels. Built-in stereo microphone for mixing in ambient sound.

Easy operation thanks to faders as well as GAIN/EQ/PAN dials for improving the sound.

#### AUDIO EFFECTS

**Reverb control that enables adjustment of sound space.**

Digital Audio effects include: Noise Gate, EQ, Reverb, Noise Suppressor, Enhancer and Master Lo/Hi Filters. Select them using the menu on the touch screen monitor.

Master Lo/Hi Filters enable stable mixing for audio streaming.

#### VIDEO EFFECTS

**Simple video compositing.**

In addition to Transition effects, Picture in Picture (PinP) and SPLIT are also available. Simply select an effect and the respective video sources.

Transition between sources with various switching effects.

SPLIT displays two video sources simultaneously

PinP inlays a small window in the main source.

PinP inlays a small window in the main source.

#### KEYER

**Control transparency with a single knob.**

Advanced video composition such as placing a person or text over a background video source can be fine-tuned using a single knob.

Chroma Key Composite a person over a background

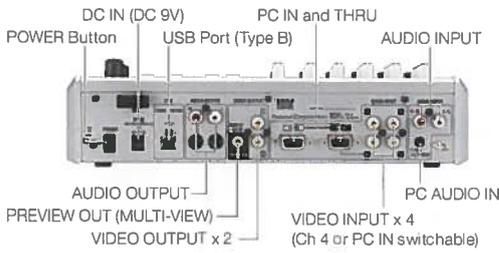

Luminance Key Composite text over a background

- 4-Channel Video Switcher (3 Composite video sources + 1 Composite/PC switchable)
- 4 Mono (XLR or 1/4") and 2 stereo mixable audio channels
- Built-in stereo microphone for mixing in ambient sound
- Built-in scan converter for PC input with a thru for connecting a projector or display
- Built-in single LCD monitor with touch control for easy video source and menu selection

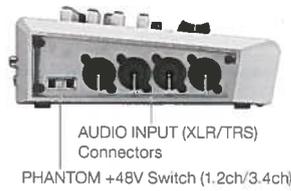

- Monitor can be used to view a quad display of inputs, program out or combination quad view with program out
- Compositing video effects include: keying, split screen, picture-in-picture
- Digital audio effects include: Noise Gate, EQ, Reverb, Noise Suppressor, enhancer and master Lo/Hi filters
- USB video/audio class device for web streaming or recording with a PC/Mac

- Bi-directional video conversion between Digital and Analog, HD and SD, Compressed and Uncompressed
- High quality A/D and D/A with internal 4:4:4 10-bit signal processing
- Enables frame size scaling, change in frame rate and I<->P
- Gen Lock with external devices

- Time code and Embedded audio are available between HD/SD-SDI and HDV/DV conversion (VC-300HD only)
- Built-in high quality audio delay to achieve perfect lip sync
- Compatible with HDV/DV Cameras and VTR from SONY, Canon and JVC
- Support for 23.976, 24, 25, 29.97, 30, 50, 59.94, 60 frame rates

## Multiple Video and Audio Processing Functions

\* HDV/DV output is not available when input is HDV/DV.

## Additional Features

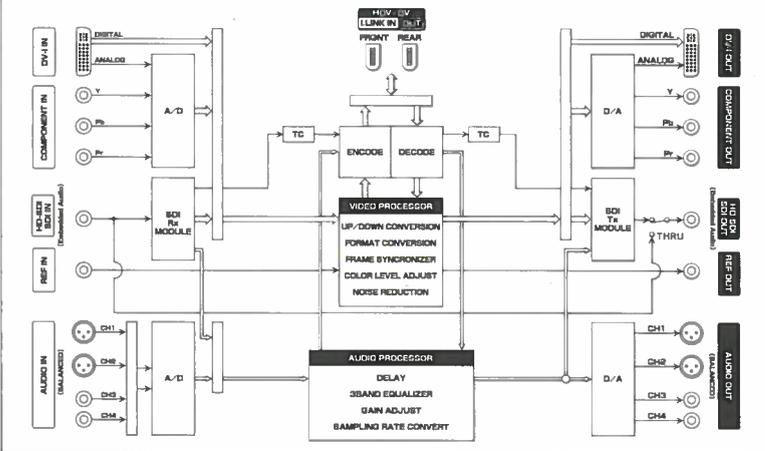

- 4 Point Gamma Correction**  
 The newly added 4 points Gamma Correct function enables adjustment of bright/dark part independently. Enhances images to have a more film-like color.
- User Presets**  
 Parameters like input signal, conversion or processing can be saved to an internal memory. Up to 3 presets can be saved and enables convenient recall.
- Remote Control**  
 Remotely control parameter setup of the VC from external devices, like a PC, via RS-422A Remote Terminal. This can be also used for parameter data backup.

## Supports 24p Frame Rates

Supports 24p, 23.976p, 25p, 30p, 60p etc.  
Enables conversion of footage shot with a variety of cameras.

- Enables use of affordable production system and media.**
- Use HDV shooting devices with current production systems.**

## Bi-directional, portable video conversion between HD/SD-SDI and MPEG-2 TS/HDV/DV

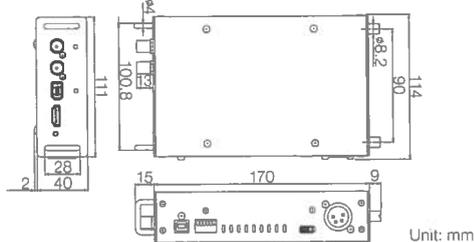

### Side Panel

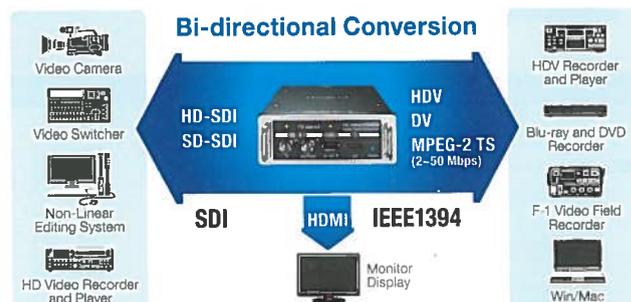

- Bi-directional conversion between HD-SDI and HDV (19/25 Mbps) and 8/35/50 Mbps MPEG-2 TS
- Supports conversion between SD-SDI and DV format (25 Mbps) and 2/9/12 Mbps MPEG-2 TS
- Easy to capture using Video Capture for VC for Windows
- Directly capture and edit using your non-linear editing system
- Easy capture or archiving to Blu-ray/DVD via IEEE1394 (iLINK)
- HDMI Output allows flexible and convenient monitoring
- Setup and Control using VC-50HD RCS for Win/Mac and/or dip switches
- Three different types of power - AA battery x 8, AC Adaptor, External battery (4-pin XLR 9 to 20 V)

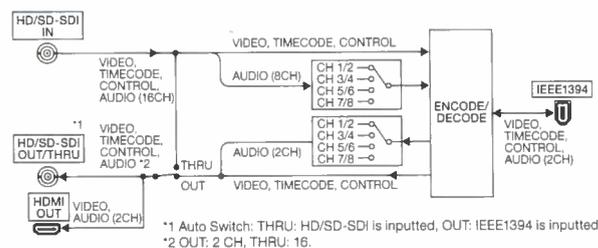

\* Up/Down conversion, I/P conversion, NTSC/PAL conversion, Frame conversion are not supported.

# P-10 | Visual Sampler

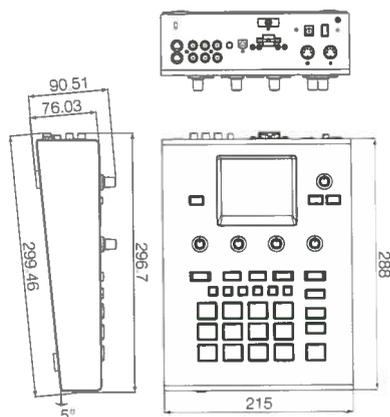

Enjoy easy-to-use, reliable playback of video and still images with dedicated video presenter

V-LINK

- Record to, and Playback from, standard SD or SDHC Memory Cards
- Capturing media from various sources (video decks, DVD players, digital cameras, etc) is extremely easy, and video is stored as Motion JPEG and still images as JPEGs
- Playback modes like Reverse, Strobe, or Motion Control provide impressive effects for your audience, Slide Show enables animation from multiple still images

- Store and recall up to 864 clips using 12 pads and 72 banks
- Built-in 3.5 inch color LCD display eliminates the need for an external monitor
- Hi-Speed USB port for rapid data transfer of media to and from a computer
- Sync your Audio & Video with V-LINK
- Includes P-10 Image Converter Software

Unit: mm

### Movie Play Modes

Forward Loop	Loops playback	Gate 1	Plays while a pad is pressed. Pauses the frame when the pad is released. Press again to start from the paused frame.
Alternate Loop	Repeats forward and reverse playback		
One Shot 1	Stops at final frame and pauses	Gate 2	Plays while a pad is pressed. Output is stopped when the pad is released.
One Shot 2	Stops at final frame without pausing		

### Easily Capture Movies and Assign Clips to Pads

- Play back an image on the external device and press the [EXT SOURCE] button.
- Press the CAPTURE [MOVIE] button at the point that you want to start capturing the movie.
- Press the CAPTURE [MOVIE] button again at the point that you want to stop capturing the movie. (Empty pads flash red.)
- Press a pad that is flashing. The captured movie is assigned to the selected pad.

# Audio Production

The V-Mixing System/Digital Snake Systems improves sound quality, reduces configuration complexity, and adds breakthrough capabilities.

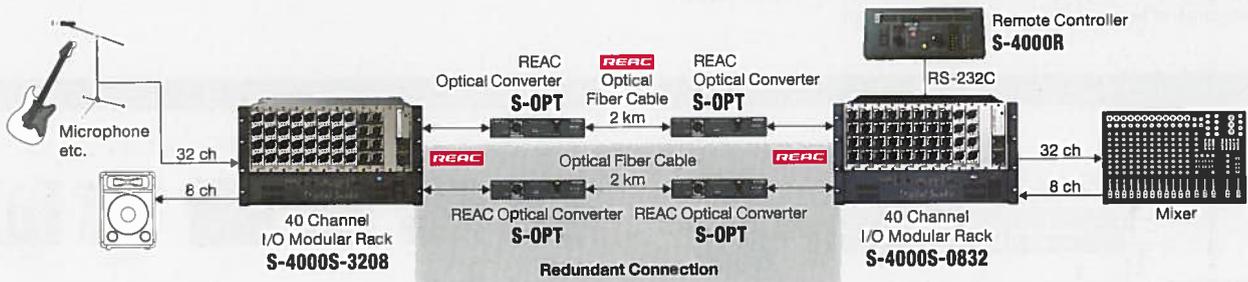

## Location Sound - Digital Snake System 8 x 8 Ch with battery operation

An 8 x 8 Ch Digital Snake system enables high quality audio transmission with an easy setup. This system is ideal when AC power is not convenient or available.

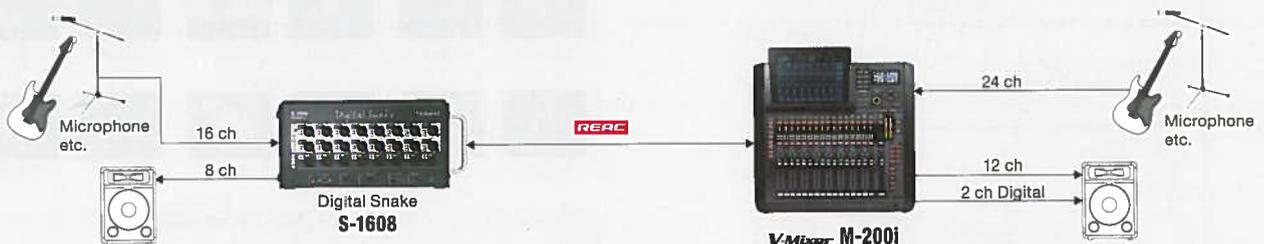

## Broadcast - Long Distance Digital Audio Transmission - 32 x 8 Ch with Redundancy

By using the S-OPT REAC optical converter and optical cables (sold separately), the REAC transmission distance can be extended to a maximum of 2 kilometers. If the main cable is compromised, the system will automatically and seamlessly switch to the backup cable.

## Live Event - Compact V-Mixing System - 40 Inputs/22 Outputs

16 mic/line inputs, 8 line inputs, 2 main outputs, and 10 assignable outputs are all included in the M-200i. Connect a Digital Snake to the REAC port to expand the number of inputs and outputs.

## Installed Sound - Standard V-Mixing System - 42 Inputs/26 Outputs

Standard System consists of two S-1608 Digital Snakes on stage.

# Audio Production

The V-Mixing System/Digital Snake System is configurable for any sound system along with convenient Split, Merge, and Embedded Power technology. It is not an "all or nothing" system so even your current mixing environment can be combined with the V-Mixing System.

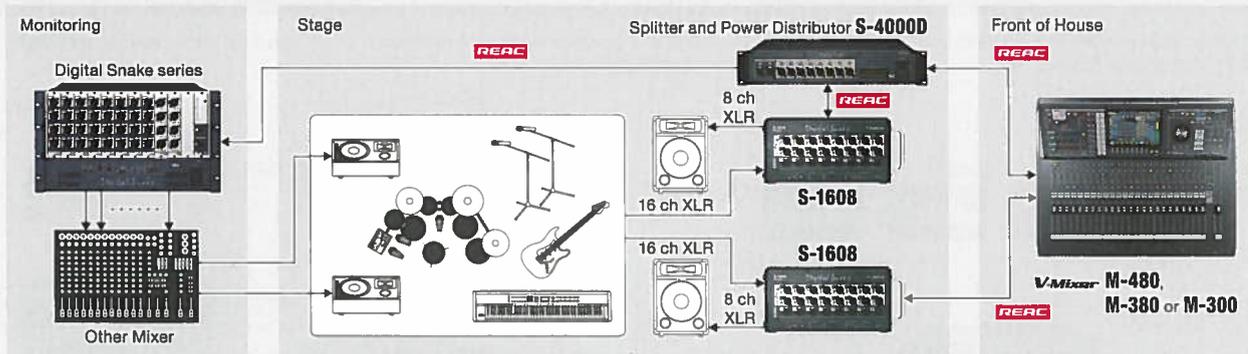

## Front of House, Stage I/O and Monitor V-Mixers Setup

The M-200i can be used as a stage I/O unit and a monitor console simultaneously with a V-Mixer on FOH.

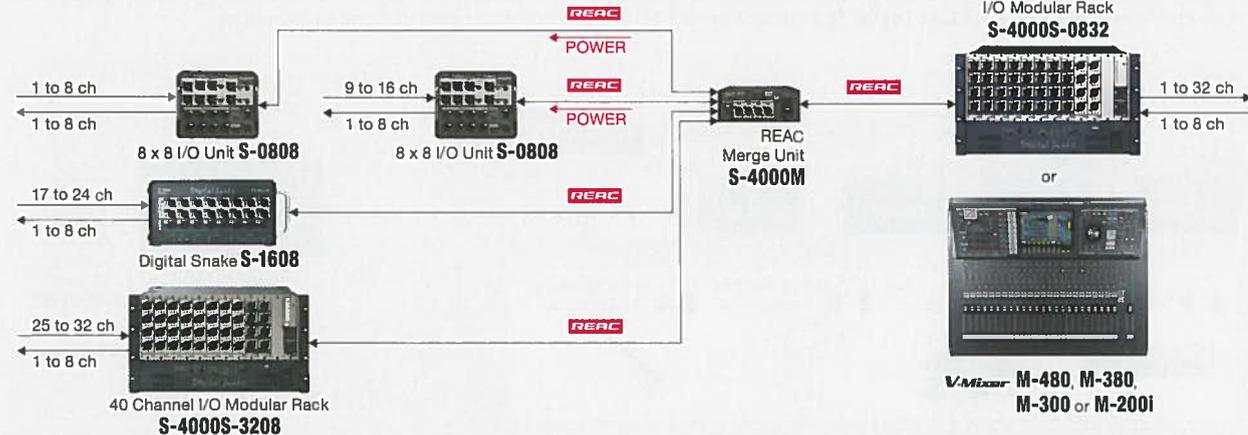

## Monitoring Split Setup using Other Mixers

Any analog or digital console can be used as a monitor console with the V-Mixing System.

## Merge Setup for Distributed Inputs and Outputs

Using the S-4000M, up to 4 REAC signals (up to 160 inputs) from Digital Snakes can be merged to one single REAC signal (40ch). The S-0808 can be used in a place where AC power is not available using REAC Embedded Power technology.

# Personal Mixing

M-48 Live Personal Mixing System offers each musician the flexibility to control exactly what they want to listen to during their performance.

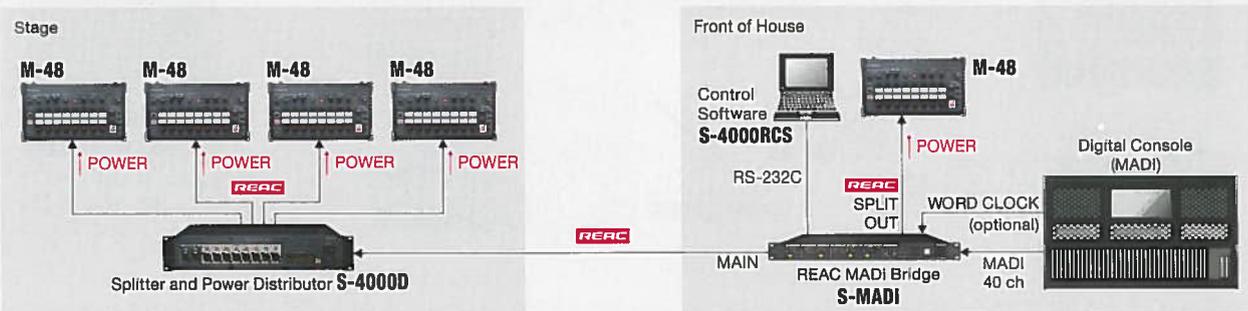

## Personal Mixing Setup with V-Mixer

The M-48 enables control of up to 40 audio sources that can be managed via 16 stereo groups - assignable and unique per musician. Any V-Mixer can setup and control multiple M-48s via the S-4000D.

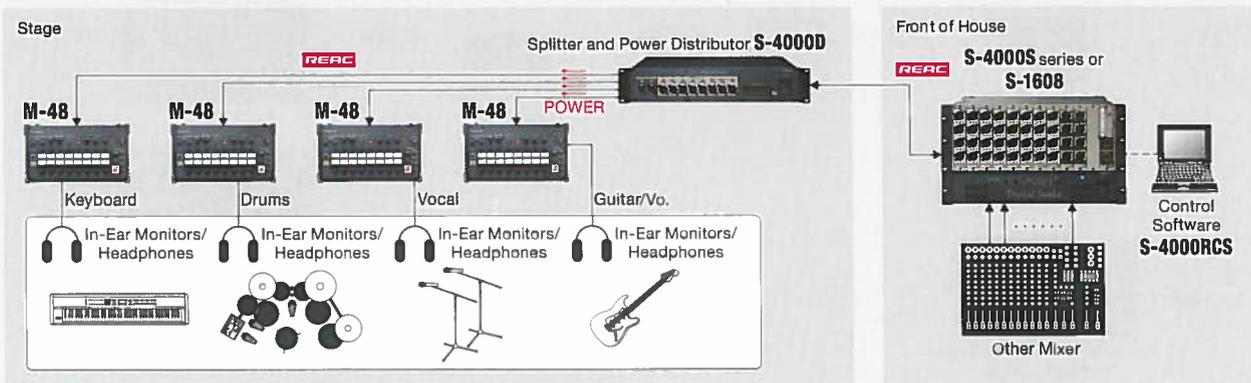

## Personal Mixing Setup with Other Digital Consoles

Connect several M-48 Live Personal Mixers to a MADI equipped digital console. An additional M-48 can be connected to the SPLIT OUT port on the S-MADI that also supplies power - all over one Cat5e cable.

## Personal Mixing Setup with Other Mixers

With your existing console, connect the M-48 along with the S-1608 (16 channel) or the S-4000S (40 channel) Digital Snake to utilize the complete system. The M-48 Live Digital Mixing System can be incorporated into your existing audio setup.

# Recording/Broadcasting

A REAC-based system enables a powerful and flexible mixing/recording environment with high sound quality, intuitive operation and easy set-up.

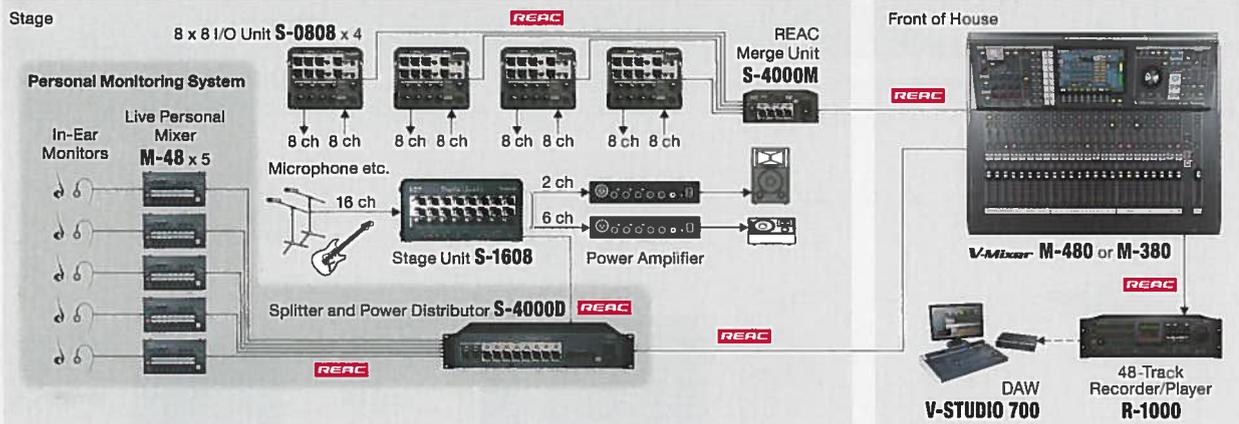

## Recording, Sound Check, Backing Track and Playback System (V-Mixer)

The R-1000 can be used as a 48-channel multi-track recording and playback system for live concerts and productions. Utilizing the benefit of bi-directional audio with REAC, the R-1000 can be connected between the V-Mixer and the Digital Snake for recording, sound check, rehearsals and training exercises.

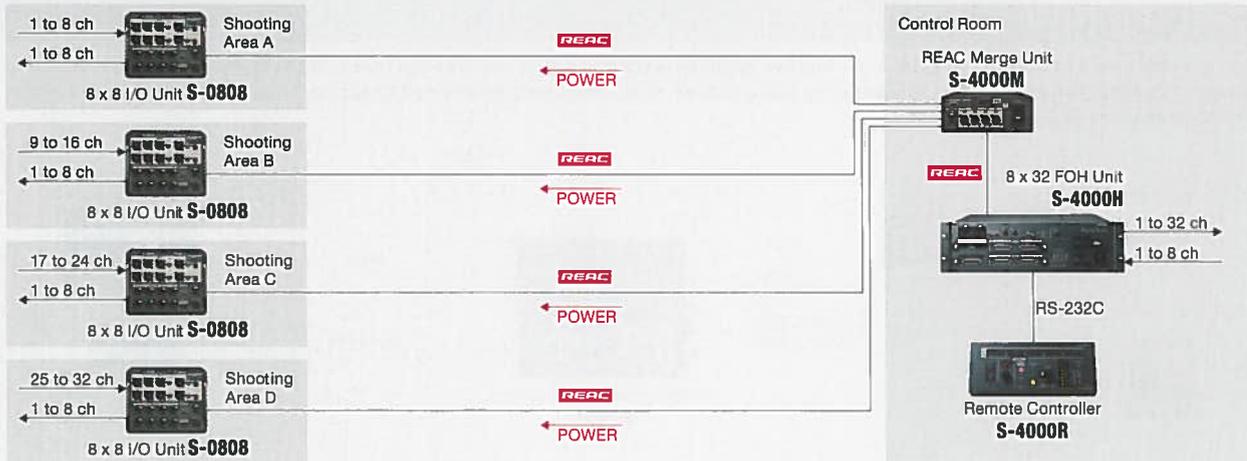

## Full Digital Mixing, Monitoring and Recording Setup

This configuration enables full digital mixing, monitoring and recording. Combining the S-0808 and S-4000M offers an unparalleled setup flexibility. This live recording system uses the REAC port of the V-Mixer (SPLIT/BACKUP) connected to the REAC port (TO MASTER) of the R-1000. Up to 40 channels of 24-bit audio from the V-Mixer is recorded to the R-1000 and once finished can be opened in any DAW software such as Cakewalk SONAR/V-STUDIO by accessing the HDD.

## Broadcasting System with Multiple Locations

This system allows I/O to be placed in 4 separate locations using S-0808s. The signals from the 4 units are merged by the S-4000M as it travels to the S-4000H breakout location. Power to each of the S-0808s is supplied by the embedded power over REAC from the S-4000M.

# Visual Production

Roland professional video products enable powerful, high quality live video production with intuitive operation. Clear user interfaces provide reliability and easy to use mixers and playback devices.

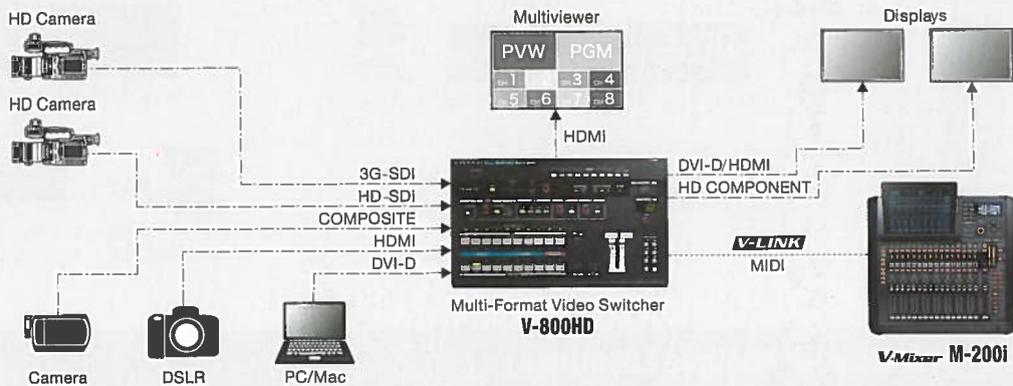

## Concert/Live Stage Production

The V-1600HD enables high quality multi-format video mixing for concert/live stage productions. Many types of video formats can be input and mixed thanks to built-in scalars.

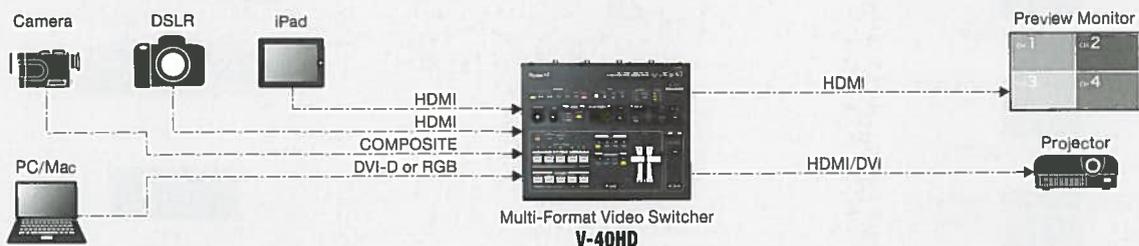

## Corporate Presentation

This presentation system enables seamless video switching between different video formats - HD/SD video sources and RGB signals from PC. With V-LINK, audio faders on a Roland audio mixer follow the input selections and T-bar position of the video mixer.

## Event Production

The V-40HD Live Video Switcher is ideal for any live event or installation that requires the freedom to connect a variety of sources whether they be digital or analog, computer or video format. It is particularly positioned to support configurations using popular HDMI cameras as well as computers.

# Web Streaming and Capture/Archiving

Integrating Roland Professional Audio and Video products together enables unique and flexible solutions suitable for many applications.

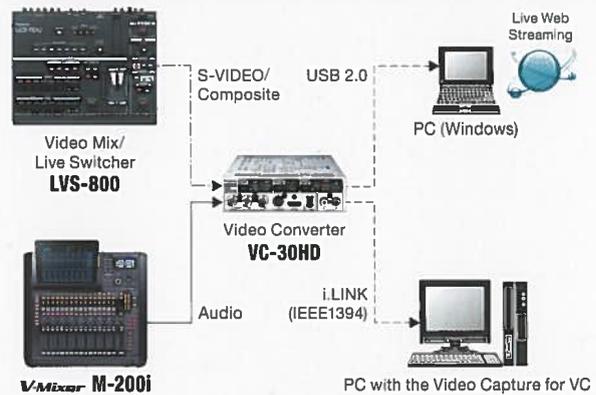

## HD Live Streaming + Archiving

Convert and combine video and audio to MPEG-2 for live streaming. Simultaneously output to IEEE1394 and USB 2.0 ports.

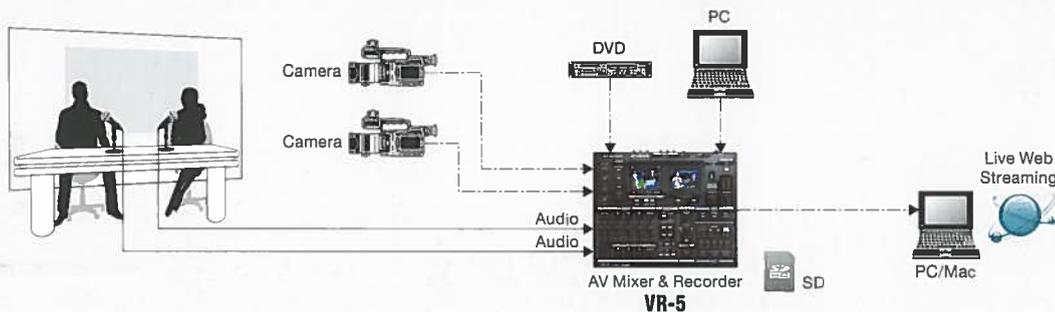

## Live Streaming + Backup Recording

Output from video and audio equipment can be combined and used for web streaming and recording to video devices for backup.

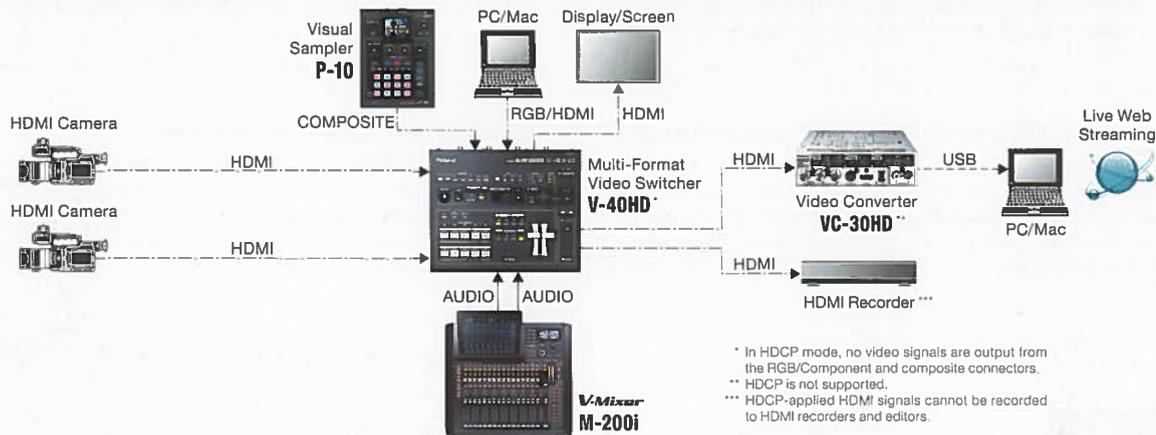

## Live Video Production and Web Streaming

The VR-5 has all the necessary functions for live production including an audio mixer, video switcher, scan converter, video recorder, media player and video output via USB. With VR-5, a live web broadcasting environment becomes simple and easy to operate.

## Live Stage/Church production with live broadcasting

The V-40HD Live Video Switcher is ideal for any live event or installation that requires the freedom to connect a variety of sources whether they be digital or analog, computer or video format. The V-40HD can input background music, narration, or other analog sound sources, mix and sync the video and audio, and then output the result via HDMI.

\* In HDCP mode, no video signals are output from the RGB/Component and composite connectors.  
 \*\* HDCP is not supported.  
 \*\*\* HDCP-applied HDMI signals cannot be recorded to HDMI recorders and editors.
