Did you know that...

All Audipack products, whether standard or custom built, are designed and manufactured in-house in the Netherlands. Our products are developed in conjunction with our clients to meet the needs of AV professionals and end users. They are designed for ease of use and durability for many years. Audipack manufacture high quantity standard products or unique made-to-measure pieces for individual projects. Many products are CE, EMC tested and TUV approved to meet safety regulations. Audipack also offers a 3 to 5 year factory warranty on all products.*

*Warranty conditions are available on requested and are stated in our general conditions of sale. All dimensions and weights are approximate, and should not be used for specifications. The general terms and conditions of sale and delivery are as registered in the trade register at the Chamber of Commerce of Gouda under no. 29031068 and the District Court of Rotterdam under no. 369/92 are applicable to all our deliveries.

Audio solutions

Sound and Design

Audio solutions

Perfect audio add-on solution for flat panels and video walls. Design audio solutions to integrate speakers visually less obtrusive in public areas.

Audipack®

It's great to have solutions...

Professional audio solutions

Wall mounted soundbar with 84" screen

The perfect audio add-on for any screen of any size videowall

Finding a fitting solution like this is normally quite a quest to find, but Audipack manufactures custom built soundbars and audio solutions to fit any screen, presentation assembly or videowall.

The main advantage is that these speaker solutions are custom built for any application and provides mounting features to any Audipack related product. No need to install more components than needed and save time by simply combining products that match each other.

Think smart, be quick.

No more unnecessary work with the Audipack soundbar with System 55 add-on. Use the Audipack soundbar as central hub for AV connectivity. Insert System 55 connections and control your media via the soundbar and save time and costs in labor and constructional installations. The S551 / S552 / S553 add-on provides a single, double or tripple mounting chassis in the speaker for System 55 Functionality.

COMPACT SOUNDBAR FOR VIDEO CONFERENCE APPLICATIONS

Ref	LSS-SB20	LSS-SB40
Dimensions in mm	W 422 x D 143 x H 147	W 422 x D 143 x H 147
Description	mono internal soundbar	stereo internal soundbar
Max. power	1 x 30 Watt RMS	2 x 20 Watt RMS
Frequency	70 Hz - 20 KHz	70 Hz - 20 KHz

This model fits the VCF-SL videoconference furniture line (page 177)

LINE ARRAY SPEAKER SYSTEM (STACKABLE)

To complement the experience...

Line array (column) speakers are ideal audio add-ons for video wall trolley's , video walls and led applications.

The AR speaker is customized to match the height of the screen. See page 41 and 51.

The AR speakers require a high output 3rd party external amplifier.

Ref.	LSS-XXXXAR (custom length version)
Dimensions in mm	W 147 x D 143 x H XXXX
Max power	240 Watt per unit at 8 Ohm
Frequency	200Hz - 20 KHz
Connections	Speakcon
Wall mounts	Included
Colour	Anodized aluminium with black or white speaker front

Ideal audio add-on for video wall trolley's and led applications. The AR speaker is customized to match the height of the screen. See page 41 and 51.

PROFILE SPEAKER SET (CUSTOM-BUILT)

Ref.	LSS-XXXXPR
Dimensions in mm	W 147 x D 143 x H XXXX (height screen)
Max power	2 x 30 Watt RMS at 8 Ohm
Connections	wire connect & banana plug
Colour	Anodized aluminium with black or white speaker front

The Profile speaker set is a vertical orientated speaker set made to match the height of larger screens and videowalls. Internal speaker technology is based on the LSS soundbar systems. The Profile speaker is installed on each side of the screen and is available in 2 x 30 Watt and 2 x 60 Watt. Custom powered versions on request.

Check the Audipack website & price list for an updated product list.

AUDIO SOLUTIONS

Unique audio solutions for public areas and boardrooms

With the LSS-UFO, Audipack presents a new way to look at audio. The modern design of the UFO offers lots of possibilities for applications in public areas and boardrooms. The UFO is a ceiling suspended speaker with 4 internal audio elements. These elements radiate the sound in the direction of their own, so that a broad beam width is created in the area. The UFO is suspended from the ceiling by 4 stainless steel wires which are adjustable in length up to 4 meters.

The combination of the anodized aluminium construction with the black or white front, not only make it a delight to look at, but also to listen to.

In combination with modern lighting technique, the UFO is a perfect solution above a conference table, in a restaurant or luxury shop. By using multiple UFO's, you have stereo sound where ever you walk in de room. With the optional 100 Volt transformer, the UFO's are also useful in 100 Volt installations.

**Ref.****LSS-UFO**

Dimensions in mm	W 706 x D 706 x H 146
Max. power	4 x 30 Watt RMS at 8 Ohm
Frequency	70 Hz - 20 KHz

FLEX-800[®] series THE ULTIMATE MONITOR FIXATIONS

The Audipack Flex-800[®] series,

*a range of products that offers perfect solutions
for Broadcast, AV and CCTV installations.*

Audipack[®]

It's great to have solutions...

Let us inspire you.....

Flexible, modular and Innovative!

- ▲ **Fast and easy installation**
- ▲ **Quick flat panel installation and removal**
- ▲ **Flexible with many components**
- ▲ **Compatible with 700, 800 and 900 series**

FLEX-800®, the ultimate monitor fixation

Audipack introduces "the ultimate FLEX-800® solution for flat screens" for all possible configurations.

The impossible becomes an easy task with the new FLEX-800® series. The FLEX-800® series offers flexible mounting solutions for flat screens on floor stands, trolleys, wall mounts, ceiling mounts etc.

Due to the flexibility of the FLEX-800® system, you can build any desired configuration. From a simple 2x1 to 7x3 configurations. Choose from the various components and the installation is a matter of minutes.

The unique feature of this product is the comprehensive suite of components which also are compatible with the Audipack 700, 800 and 900 series floor stands.

Wall fixations, stand-alone units in broadcast studio's, multiviewers or CCTV rooms. The system is ideal for permanent installation, but also for rental.

Modular and flexible; that's what FLEX-800® series means to you.

700 series

Flat panel floor stands

The 700 series Flat panel floor stands

The well-known Audipack 700 series is a range of double column supports and stands for flat panels offering stability combined with flexibility.

It's a concept that meets the functional, technical and aesthetic demands of today's professional presentations.

Audipack[®]

It's great to have solutions...

Audipack 700 series, designed to be **displayed!**

- ▲ **Landscape or portrait screen positioning**
- ▲ **Integrated cable channels**
- ▲ **Continuously adjustable flat panel height**
- ▲ **Standard or custom built models available**

The Audipack 700 series flat panel floor stands – presentation solutions offering many advantages.

The Audipack 700 series is a range of supports and stands for flat panels that offers precision combined with flexibility.

Meeting the functional, technical and aesthetic demands of today's professional presentations, they create a base for numerous applications where design, safety, user-friendliness and flexibility are key requirements.

Choose your interface.

The FS series is available with 2 different screen interfaces. The L&S 5 is the Audipack's AV cross rental solution with a wide variety of installation options on the job. The Mult-Vesa solution is a very cost effective mounting interface based on the Vesa mounting pattern on the screen.

With mounting cams the screen can easily be locked in the mounting head.

L&S 5

Mult-Vesa

The perfect rental combination.

The 700 series quick release floor stands can be separated by hand and fitted into an Audipack flight case along with the flat panel. Available for any screen size.

Flight cases are available in different colours with optional logo prints. Please refer to our separate flight case section on page 158 for more flight case solutions.

800 series

Flat panel floor stands

The 800 series Flat panel floor stands

The new 800 series floor stand redefines flexibility, quick installation and installer friendliness when it comes to floor stand solutions.

Audipack®

It's great to have solutions...

Audipack 800 series, designed

to be *noticed*

The 800 series floor stands are specially designed to match slim line flat panels.

The 800 series free standing display is designed to cover today's questions.

It's a slim line well thought of floor stand offering lots of options and solutions.

The column shape is nicely balanced in size for current slim-line flat panels.

The two hidden cable channels in the column are reachable by the two automatic closing doors. The 800 series column is available in a fixed version and Quick-Release tool-less rental version. By combining the floor stand with an Audipack flightcase all components are neatly organized in the flightcase together with the screen.

The perfect rental combination

The 800 series quick release floor stands can be separated by hand and fitted into an Audipack flight case along with the flat panel. Available for any screen size.

Flightcases are available in different colours with optional logo prints. Please refer to our separate flightcase section on page 175 for more flightcase solutions.

- ▲ **Elegant column design**
- ▲ **Landscape or portrait positioning of the panel**
- ▲ **Two integrated cable channels**
- ▲ **Continuous height adjustment**
- ▲ **Integrated measuring ruler for precise positioning**
- ▲ **Standard models or custom built available**

Easy cable access

Available with scratch resistant coating

Flat panel position ruler

Quick release, perfect rental solution

AUDIO SOLUTIONS

For every flat panel a made to measure soundbar is available. See chapter "Audio solutions" for more information page 3

900 series

Flat panel floor stands

The 900 series Flat panel floor stands

The Audipack 900 series is a range of supports and stands for flat panels offering stability combined with flexibility.

It's a concept that meets the functional, technical and aesthetic demands of today's professional presentations.

Audipack®

It's great to have solutions...

Audipack 900 series, designed to be **noticed**

Combining style with strength, the Audipack 900 series flat panel floor stands are easy on the eye and easy to install.

Calling on Audipack's many years of experience with display stands and accessories, the 900 series incorporates numerous clever features, such as an integrated height position ruler and access hatches for cabling.

As with many Audipack stands and brackets, the 900 series is equipped with the Lock&Secure quick mounting system. Once installed, the flat panel is locked firmly in place for safety and security.

Customised versions of the 900 series products are available on request.

The perfect rental combination.

The 900 series quick release floor stands can be separated by hand and fitted into an Audipack flight case along with the flat panel. Available for any screen size.

Flight cases are available in different colours with optional logo prints. Please refer to our separate flight case section on page 158 for more flight case solutions.

1000 series

Flat panel floor stands

The 1000 series Flat panel floor stands

The most stylishly designed flat panel floor stand in the world.

Audipack[®]

It's great to have solutions...

Just that extra little

bit of class

Ideal for your reception area or just for extra 'wow' during your presentation.

The Audipack 1000 series flat panel floor stands for screens up to 90 inch.

The 1000 series stands out with its high finish level and class. The floor support comprises a high gloss black floor plate and a sturdy but stately rectangular column.

Combined with the Audipack flat panel monitor installation brackets, it offers a minimalistic look.

Available for 32-65" and 65-90" screen sizes.

To install your flat panel to an Audipack product an additional flat panel bracket is needed.

See "Mounting brackets for flat panels" section on page 45 for an overview of the available brackets.

- ▲ High quality finishing
- ▲ Invisible cable management
- ▲ Portrait or landscape flat panel positioning
- ▲ Custom built models available

Optional: EC-1 or EC-1AC (incl. 3-way power strip F, CEE 7/4) Equipment holder

Easy player access

Neatly finished back side

Height adjustable

floor stands

Height adjustable floor stands

The all-in-one solution for transporting and lifting your larger flat panels up to 120 Kg.

Audipack[®]

It's great to have solutions...

Automatically raise your large screen

out of the flightcase

The perfect rental solution for large and heavy screens

These dividable floor stands create a compact system that can be easily transported together with a flat panel, all in one flight case.

The simple to assemble parts create a rigid and pleasing floor stand that lifts the flat panel effortlessly out of the flight case and raises it up to the presentation position – all automatically. Ideal for large and heavy screens, including touch screens.

- ▲ Suitable for screens up to 120 Kg.
- ▲ Flexible height adjustment
- ▲ Rigid construction
- ▲ No tools needed

FS-QR120E

Optional	Flightcase

Lift any screen up to 60 kg out of the flightcase!

Safety first! The **390966** and **390968** stack lift requires a yearly obligated safety check-up NEN-EN-ISO 12100:2010NL

Build-up the Stack-Lift (all parts are in the flightcase)
 Turn the flightcase around and connect the screen to the Stack-Lift mounting head
 Move the flightcase and manually lift your screen to presentation height straight out the flightcase without personal lifting.
 See next page for flightcases for 390966 and 390968

All-in-one Trolley

for Flat panels

The FSW-Atlas presentation trolley

the all-in-one presentation trolley equipped with integrated audio, data, video connections and power sockets.

Audipack®

It's great to have solutions...

Total solution in one

Presentation trolley

The FSW-Atlas, a total solution in one presentation trolley; the easiest way to set up your mobile presentation.

The Audipack FSW-Atlas makes it easy for you. The Atlas trolley is an all-in-one trolley with invisible integrated audio in the column. In addition, there's also a 3-fold power strip integrated for connecting the monitor and optional equipment.

In the wheel frame of the trolley you will find a PowerCON power connection, RJ45, HDMI and space for extra connections.

With a Lock & Secure 5 mounting bracket, the screen is easily installed. The screen height is adjustable in several different positions.

For installing additional equipment such as mini pc's and wireless presentation equipment, Audipack provides several brackets, even with integrated power distribution.

- ▲ Lockable wheels
- ▲ Easy equipment installation
- ▲ Powercon power, HDMI and RJ45 in wheelframe
- ▲ Integrated 3-fold power strip F, CEE 7/4
- ▲ Portrait or landscape flat panel positioning
- ▲ Integrated Audio elements

To install your flat panel to the Audipack FSW-Atlas, an additional flat panel bracket is needed.

See "Mounting brackets for flat panels" section on page 47 for an overview of the available brackets.

Height adjustable Trolleys

for Flat panels

Audipack[®]

It's great to have solutions...

Height adjustable Trolleys

- ▲ Lockable wheels
- ▲ Easy equipment installation
- ▲ Durable, well designed and slim constructions
- ▲ Safe and secure

Height adjustable trolleys, designed for flat panels and touch screens.

Flexible, durable and rigidly constructed these trolleys are an ideal solution for the education market.

Fit any (touch)screen to the trolley and with the optional Audipack audio solutions the total set-up is clean and well finished.

Audipack designs and manufactures in privately owned design studios and factories, so we can customise the system to suit individual customer's needs. We use our own durable materials that are easy to clean and highly scratch resistant.

Mobile video wall

Display for Flat panels

The Mobile video wall display is a flexible solution that enables you to move your presentation to the desired location

Audipack®

It's great to have solutions...

MOBILE VIDEO WALL DISPLAY

The Mobile Video Wall Display is the flexible solution in comparison with a wall mounted or ceiling suspended video wall. The display is made on request and offers lots of possibilities.

As Basic model, Audipack supplies 3x3 and 4x4 configurations for screens of 46", 47", 55" and more. A rigid base frame with lockable wheels, aluminum powder coated frame (Black, RAL 9005) and high finishing grade.

Upgrade options:

- ▲ Column speaker 2 x 240 Watt
- ▲ Passive soundbar 2 x 60 Watt
- ▲ Electric height adjustment
- ▲ Active subwoofer
- ▲ Decor panel (to cover back of screens)
- ▲ Grill in order to cover the backside of screens

The electric height adjustment enables you to lower the video wall when moving the display to another location, or raise the video wall higher for a better view by the audience.

Install the Audipack column speakers on both sides of the video wall for not only a perfect audio support for your presentation, but also for a neat side view finishing of the video wall. The vertical soundbars are customized to match the height of the video wall. The soundbar is customized to match the width of the video wall.

Please contact Sales for more information.

- ▲ **Available for all screen sizes**
- ▲ **High grade finishing**

PROFILE SPEAKER SET (CUSTOM-BUILT)

Ref.	LSS-XXXXPR
Dimensions in mm	W 147 x D 143 x H XXXX (height screen)
Max power	2 x 30 Watt RMS at 8 Ohm
Connections	wire connect & banana plug
Colour	Anodized aluminium with black or white speaker front

The Profile speaker set is a vertical orientated speaker set made to match the height of larger screens and videowalls. Internal speaker technology is based on the LSS/LST audio systems. The Profile speaker is installed on each side of the screen and is available in 2 x 30 Watt and 2 x 60 Watt or higher. Custom powered versions on request.

Check the Audipack website & price list for an updated product list.

ACTIVE SUBWOOFER

Video wall and Multi screen solutions

Create a video wall in any configuration...

The Audipack video wall mounting system is the most solid and adjustable system on the market.

Save time and money on the installation.

Audipack®

It's great to have solutions...

Create a **video wall** in any configuration

in next to **no time!**

Less effort for screen alignment perfection

Installing video walls with Audipack's installation systems saves time and money.

Audipack offers two systems:

VWM Basic system

The universal **VWM basic system** is a low cost, high value installation system that gives fast and precise installation.

The construction looks simple, but there is more than meets the eye. Each screen is separately adjustable when it is installed to the wall or rental flying frame.

The system copes easily with 2x2, 4x4 or even 8x4 configurations. With a simple addition of our screen installation cams, the screens are installed in an instant.

VWMS Serviceable system

The **VWMS serviceable system** is an impressive product that supports the installation of multiple screens on a wall whilst allowing individual screen access for servicing needs.

Each screen in the videowall can be pushed out from the wall, with the Push-to-Release system for service or repair. Simply push the screen back in when complete. The built-in adjustment feature means perfect alignment, even on a non-level wall.

The system copes easily with 2x2, 4x4 or even larger configurations. With a simple addition of our screen installation cams, the screens are installed in an instant.

VIDEO WALL SYSTEMS

VIDEO WALL PUSH TO RELEASE SYSTEM VOOR EASY SERVICE

Mounting head

Manually accessible, with Push to Release system

- ▲ Short installation time due to "row installing"
- ▲ Push-to-Release system for easy flat panel access
- ▲ Compact offset dimensions (only) 80 mm
- ▲ Post-installation fine tuning of height and leveling for a seamless installation
- ▲ Standard multi-axis adjustable interface, extendable up to VESA 600 x 400

A perfect aligned videowall, installed in a perfect time and all screens are serviceable. Those are the key elements of the VWMS videowall system. A system that installs with low effort featuring lots of alignment options in 6 axes, even when the wall is not finished well or is not perfectly level. The build-in 3D adjustment features deals with it all. Simply install the mounting heads with the use of the special installation ruler to the wall, mount the two brackets to the flat panel and hang the display on the mounting head. Align the display with the adjustment features.

PUSH TO RELEASE SYSTEM FOR EASY SERVICE

AUDIO SOLUTIONS

For every flat panel a made to measure soundbar is available. See chapter "Audio solutions" page 3 for more information

Wall mount solutions

for flat panels

The Audipack wall mounts,

are a range of products that offer perfect solutions for Pro AV use or permanent installations.

Audipack®

It's great to have solutions...

Flexible, strong and Innovative!

The strongest and most innovative solutions for wall mounting screens

The Audipack **wall mounts** are specifically designed for quick and safe installations; see them as temporarily rental applications, or for permanent installations. Key benefits include durability, speed of installation and easy product access.

The **Universal wall mounts** offer a wide range for the safe and fast installation of flat panels. Durable, flexible and adjustable they offer the perfect solution for every screen. With the special build-in "align feature" drill mistakes can be solved easily.

The **Professional temporarily AV wall mounts** are specifically designed for professional installations. The special Lock&Secure mounting interfaces guarantees a quick installation and panel switch if required. Especially suitable for projects, public places, convention centres etc. To install your flat panel to an Audipack ProAV wall mount an additional flat panel bracket is needed.

(registered product)

A wide range of VESA and universal mounts is available. All our flat panels wall mounts are safe and easy to install and are available for flat panels up to 120 inch diagonal.

- ▲ **Fast and easy installation**
- ▲ **Quick flat panel installation and removal**
- ▲ **Theft delay**
- ▲ **Very rigid design**

SCREEN-CRAWLER (INSTALLATION AID)

The Screen-Crawler makes it possible to safely lift large screens, with a minimum of effort and less installers. You simply attach the screen with hoisting cables/bands to the hoist aid and hoist up the screen with the winch.

After placing the screen to the wall mount, you're done! With a WLL lifting capacity of 200 kg, it can handle mostly all big screens. It's easy to transport, due to its light weight.

Ref.	SC-190
------	--------

Max load	200 kg
Height (retracted)	1990 mm
Max. lift height (hook)	2900 mm

Optional: **P6611**, lifting aid with eyebolts for lifting loads with bands or chains (bands and chains not supplied)

- ▲ Complies with NEN-EN-ISO 12100:2010NL
- ▲ Yearly check-up required

Flat panel presentation board

Soundbar solutions,

the perfect quick-install all-in-one presentation solution.

Flat panel presentation board

The FPB series is a quick install wall mounted accessory to provide a compact and neatly organized presentation product for screens, audio and camera.

For small sized presentation solutions the FPB allows an easy installation. Just install the finishing board to the wall, the equipment in the monitor bracket and install the screen and camera.

Depending on the thickness of the extra equipment behind the screen, the screen distance to the panel can be adapted.

The FPB is standard equipped with space for an audio option and space for installing a VC camera.

The FPB boards are standard available in white, other colours or veneer on request available.

Wall arms

for flat panels

Audipack flat panel swivelling wall arms;

a world standard in stability and ease of use.

Audipack®

It's great to have solutions...

Relax and enjoy the flexibility

Enjoy your flat panel from anywhere in the room.

Face the screen towards your kitchen, child's play area or your guests. The clean lines of the design negate the need for complex supports.

These extremely stable wall arms allow the flat panel to be set in any position. Their minimalistic looks and neat dimensions ensure the attention is focused on the screen rather than the wall arm. All cables are hidden in the arm itself, so unsightly wiring is out of sight.

Use the **Screen-Crawler** (SC-200) Installation Aid for safe installation of large, heavy screens. (See page 63)

- ▲ **Rigid and safe construction**
- ▲ **Lockable in every position**
- ▲ **Very flexible in use**
- ▲ **Integrated cable duct in swing arms and wall plate**

Ceiling mounts

for flat panels

With flat panels becoming an increasingly important element of any professional install,

the installation speed, adjustability and stability of the accessories are important features.

Audipack introduces the new generation of ceiling mounts for flat panels.

Audipack[®]

It's great to have solutions...

CEILING MOUNTS

Stylish and Professional!

Audipack's flat panel ceiling mounts are durable mounting solutions that allow height and angle adjustment of the flat panel.

The flat panel ceiling mounts are slim, discreet and suitable for any brand and type of panel. This product line enables quick installation and complements any installation. Flexible screen adjustment and neatly hidden cables within the tubes are standard features.

Fixed lengths and telescopic versions are available to position the screen perfectly for every height and location.

The colour of the mounting head is standard black RAL 9005

- **The CMV1 and CMV2 series** feature a new special ball-joint to easily direct and adjust the screen towards the viewer. This product line offers standard VESA 75, 100 and 200 mounting patterns.

- **The FCM and FCMD series** are durable and rigid product lines that offer flexibility for installing *larger single* or *back-to-back* screens. Perfect for pro AV installation projects.

With the standard available options it is very easy to adapt the ceiling mounts to meet your installation specifications.

The 800 series flat panel ceiling mounts are designed for installations with large screens installed onto high ceilings. The product stability allows a slim but long ceiling mount, hiding all cables and offering a continuous height adjustable mounting head with forward inclination.

With the Audipack Lock&Secure system the flat panel is easily mounted and quickly secured. Custom-made models are available in lengths up to 4 metres.

- ▲ **Telescopic models available**
- ▲ **Perfectly angle adjustment**
- ▲ **VESA and L&S 5 suited**
- ▲ **All cables hide through the tube**
- ▲ **VESA and L&S 5 in black**

Ceiling to floor solutions

for flat panels

The Audipack ceiling to floor solutions

A free standing and solid solution in any environment

Create a free standing

solution...

The ceiling to floor (CTF) and floor to wall (FTW) products are the ideal solutions for installing flat panels in a free standing position in a room or when a wall is too weak constructed to hold a rather large (touch) screen. The CTF and FTW products are manufactured from modern designed aluminium profiles with an integrated cable duct. For each application a choice, that's why Audipack offers 3 different contour shaped profiles.

Your choices:

The 700 series is the slimmest model which can be used in a single and double version. With its detachable cable duct covers it offers a slim but strong presentation solution.

700 series

The 800 series is a mid-size profile with 2 cable ducts and suitable for mid to large sized LED screens. The screens can be installed along the length of the column.

800 series

The 900 series is the most rigid and strong column. It's strong enough to hold the heaviest screens and rigid enough to handle the longest lengths. With its large internal cable duct the best solution for multiple screen installations like videowalls.

900 series

**The ceiling to floor solutions can be made in any length.
A perfect solution for any situation...**

Order explanation:

CTF-700D-3000

Length from constructional ceiling to floor
(any length available)

Double 700 series column

Ceiling to floor solution

- ▲ **A free standing solution**
- ▲ **Rigid and flexible construction**
- ▲ **Single or multi-screen mounting**
- ▲ **Integrated cable duct all columns**

Choose your interface.

The FS series is available with 2 different screen interfaces.

The L&S 5 is the Audipack's AV cross rental solution with a wide variety of installation options on the job. The Multi-Vesa solution is a very cost effective mounting interface based on the Vesa mounting pattern on the screen. With mounting cams the screen can easily be locked in the mounting head.

Mounting interface: L&S 5

Multi functional mounting interface:
Multi-Vesa 400x400, 600x400, L&S 3, L&S 5

To install your flat panel to an Audipack product an additional flat panel bracket is needed.

Ceiling to Floor with integrated Audio

Permanent presentation solution with integrated audio.

The CTF-Atlas is a unique ceiling to floor solution for your flat panel up to 65 inch.

The secret of this presentation solution is the integrated audio feature of 2 x 30 Watt in the vertical column.

A LED screen can be installed via the L&S5 mounting interface and with an equipment holder EC-1 or EC-1AC (optional) a Mac mini, mini PC or Barco Click- Share mini can be applied.

The CTF- ATLAS has a standard length that can be shortened if needed. Other lengths can be ordered custom-made to fit the specific ceiling height.

- ▲ Easy equipment installation
- ▲ Portrait or landscape flat panel positioning
- ▲ Integrated passive audio

Column mounts

for flat panels

The Audipack column mounts for flat panels

are the most flexible solution for mounting onto pillars or columns

Stylish and Professional!

Order explanation:

FKM-0400B

Available for multiple screen mounting

Available for multiple screen mounting

Audipack column mounts are ideal for installing flat panels onto round or square columns.

The metal clamp gives a flexible and secure method of mounting that does not undermine the column's strength. All Audipack Lock&Secure mounts can be used in conjunction with this product.

These mounts are custom made to the client's order. They are available in difference diameters for single or multiple flat panel installation.

A slim and solid solution for all situations. No drilling needed.

To install your flat panel to an Audipack product an additional flat panel bracket is needed.

See "Mounting brackets for flat panels" section on page 47 for an overview of the available brackets.

Check www.audipack.com for an updated product range

Lift system solutions

for flat panels

Have you ever thought about hiding your flat panel when not in use?

It's no problem with the Audipack lift system solutions. A push of a button lifts, lowers, hides and rotates a flat panel of any size.

Audipack®

It's great to have solutions...

Experience the magic of the unexpected

CUSTOM-MADE

Flat panels appear out of nowhere, impressively, silently and safely with Audipack lift system solutions.

There are multiple options to hide your flat screen when not in use. Because every situation and flat panel used in a project is unique, Audipack designs custom-made solutions.

Get inspired by the possibilities!

Vertical ceiling lifts

Our high quality and durable vertical ceiling lift lowers a flat panel silently from above the ceiling. The lift is standard equipped with a dropdown safety device and ceiling finishing kit. The lift is silent because of the low voltage motors. The use of high quality components guarantee you of a durable, reliable and low maintenance system. A ceiling hatch that opens before the flat panel is lowered is available as an option, as well as electric rotation and inclination of the panel.

High-end Pop up lift systems

These high-end flat panel pop up lifts provide a superb solution for the presentation of a flat panel, if space comes at a premium, or if aesthetics require that the flat panel is out of sight when not in use. These lifts are suitable for cabinet mounting and are operated by very silent electrical motor drives. Rotation and electric hatches are available as options.

"Please contact sales for additional technical information"

- ▲ **Custom-made**
- ▲ **Available for any size of screen**
- ▲ **Very slim finishing**
- ▲ **Low noise lift mechanism**

Wall mounted lift systems

for touch screens

The electric height adjustable wall lift systems,

allow you to use touch screen monitors in a more flexible way. Just push a button to change the user height. Ideal for schools or rooms with multiple users. The wall systems are easy to install and there are floor and ceiling options.

Audipack[®]

It's great to have solutions...

Plug & Play height adjustable wall lift systems

Height adjustable wall lift systems for touch screens

These wall lift systems are perfect for the education market, being flexible, durable and rigidly constructed.

Lift your large flat panel or touch screen in any position with just the touch of a button.

These lift systems offers a very short installation time! The lift systems are provided with an universal mounting systems to mount any brand and type of screen up to 160 Kg.

Audipack designs and manufactures in privately owned design studios and factories, so we can customise the system to suit individual customer's needs. We use our own durable materials that are easy to clean and highly scratch resistant.

Use the **Screen-Crawler** (SC-190/SC-200) Installation Aid for safe installation of large, heavy screens. (See page 63)

1 hour installation!

- ▲ **Short installation time**

Fold down ceiling lift systems

for flat panels

***Ever thought of hiding your flat panel
when not in use?***

Audipack offers a neat solution

Audipack®

It's great to have solutions...

Flat panel *fold down* lift systems

A different thought about concealing your TV in the room...

When installing TV's on the wall, or popping out of a furniture is not an option or simply not possible, than the Audipack fold down lift systems are the best solution.

With this unique system the TV folds down from the ceiling with just a push on a button. The TV is mounted to the ceiling, but cause of the 100 degrees opening angle the TV aims perfectly to the viewing position.

The fold down lift systems are available in surface mounted and in-ceiling mounted units.

The **surface mounted** versions are very thin lift systems that can be installed in any room, from bed rooms to small offices. The lightweight lift enables an easy and quick installation for any installer.

The **in-ceiling mounted** versions are available up to almost any screen size. With these models an automatic lowering panel is optional available to close the ceiling above the TV; as if the TV has always been there....

In-ceiling mounted model with optional available ceiling closing unit

Surface mounted model

- ▲ **Ultra-thin installation height (surface mounted version)**
- ▲ **Perfect viewing angle**
- ▲ **Neatly finished, no mechanics visible**

Minimalistic design and neatly finished

Optional ceiling closing unit

Neatly finished

Outdoor models, a water repellent rubber seal closes the lift up to IP 56.

SURFACE MOUNTED FOLD DOWN LIFT SYSTEMS

Standard VESA 100 x 200, 200 x 200, 200 x 400 and 400 x 400, no additional bracket required

"Registered design, patent pending"

ACCESSORIES

WALL SWITCH

Only suitable for fold down ceiling lift with just falling ceiling part.

Ref. 261318

REMOTE CONTROL

Ref. 260214 (IR) 260215 (RF)

ELECTRIC CEILING CLOSING UNIT

The electric ceiling closing unit is an optional unit that closes the ceiling above the flat panel in opened position. This advantages in a continued ceiling structure above the screen and makes the lift almost invisible. Please refer to the price list for a model listing.

Liftomatic®

rental systems

Protect your equipment by using the Audipack Liftomatic flat panel lifting range.

The flat panel Liftomatic® is an all in one transport and presentation solution for screens up to 90"

Audipack offers two types of Liftomatic® systems;

Flightcase Liftomatic® systems. This flightcase with built-in telescopic lift system accommodates flat panels with a diagonal up to 65 inch. With just the push of a button your screen rises to a presentation height of 1800 mm (centre screen). Inside the flightcase is a big accessory compartment. As option there is a cover plate to cover the top of the flightcase in open position during use.

Liftomatic® systems with retractable wheel

Audipack also engineers and manufactures custom rental systems for the easy transportation and set up of LED and OLED walls.

The high tech components and intuitive controls minimise the need for tools or the handling of products.

Indoor housings

for flat panels

The indoor housings are the perfect way to protect and brand your flat panel

Audipack®

It's great to have solutions...

Screens

in public places

Screens mounted in public places demand protective solutions.

The Audipack lockable indoor housings offer heavy-duty protection for the flat panel, and a sleek, modern look that does not detract from the screen content.

The indoor theft delay housing is a security housing for digital signage projects. A fully removable front with hardened glass protects the monitor.

It is available in portrait or landscape models.

The stylish glass front is made from polished, coated and hardened glass and the housing also offers internal space for equipment such as players and switchers.

Slim-line indoor theft delay housings are also available for LCD and LED screens with a reduction in depth of 50% to complement thinner panels.

- ▲ Suitable for any brand and type of flat panel
- ▲ Very easy installation
- ▲ Easy equipment and flat panel access
- ▲ Available in Any RAL colour and finishing

(FSMT-70) The flat panel is very easy accessible

High level finishing

Easy access after unlocking the glass front

Optional available in any RAL colour

Slim-line THEFT DELAY HOUSINGS

For screens up to 75 mm. depth
Max. brightness: 700 cd/m²

Screens in shops

FSMI housings with open front are suitable for installing screens in shop window environments. The open front structure allows to extract the heat radiation from the screen without using forced ventilation.

FSMI housing can be installed to 700 and 900 series floorstands and to the ceiling to floor CTF systems.

In combination with the ACG air curtain, the heat radiation of the shop window can be cooled down.

Slim-line **INDOOR HOUSINGS OPEN**

For screens up to 75 mm. depth

Max. brightness: **700 cd/m²**

Ideal for retail areas

Outdoor housings

for flat panels

The Audipack outdoor housings

The Audipack outdoor solutions finish and protects flat panels in outdoor applications

Audipack®

It's great to have solutions...

Flat panels in open areas, and public places

Flat panels are being used more often for media systems in public spaces and outside areas, and need to be protected against the climate and vandalism. Each outdoor housing is custom -made for the specific flat screen and environmental circumstances

Audipack's flat panel housings enclose the panel in a sturdy, durable and easy to mount metal housing with a safety glass front.

The front of the housing is locked, opened with a unique key for maintenance and installation. Available with standard or custom built mounting accessories.

The standard outdoor housings are equipped with:

- ▲ thermostatically controlled ventilation and heating system
- ▲ safety glass
- ▲ replaceable filters

The standard active ventilation and heating system reduces condensation inside the housing, with Ip rating IP55.

The high brightness outdoor housings have IP rating IP65 and are equipped with:

- ▲ thermostatically controlled ventilation and heating system
- ▲ safety glass
- ▲ airconditioning (needed for high brightness screens)

- ▲ **Suitable for any brand and type of flat panel**
- ▲ **Very easy installation**
- ▲ **Easy equipment and flat panel access**
- ▲ **Available in Any RAL colour and finishing**
- ▲ **Landscape and portrait models available**

(FSMO-70) The flat panel is very easy accessible

High level finishing

Easy access after unlocking the glass front

Standard in RAL 9016
Optional available in any RAL colour

Presentation

kiosks and displays

The Audipack presentation display is the ideal solution for an elegant, professional infotainment system

A perfect solution for every environment available in Indoor, outdoor and landscape models.

Audipack®

It's great to have solutions.

Let your **message** speak for itself

with the **Eye-Point®!**

The Outdoor Eye-points® are practical and beautiful. These slim built and neatly finished kiosks are available for 46" high brightness screens, and on request are available for any type and size.

- Safety glass front
- Swivelling flat panel arm for easy equipment access
- Suitable for any weather conditions

Thanks to the extensive choice of materials, colours and wrappings, the Eye-Point is applicable in any environment and situation.

- ▲ **Indoor and outdoor versions**
- ▲ **Available for many screen sizes**
- ▲ **Glass or open versions**
- ▲ **Custom colour designed**

All models integrated quick-installation L&S5 swivelling arm

Glass version

With its new-age design,

the Eye-Point® is a flexible, mobile presentation display that clearly communicates your message or information to your audience. The modern looks and distinguished design are at home in any environment – from the showroom to the supermarket. The flat panel is hidden and protected by the neatly assembled, strong casing.

The product serves the needs of you and your customers. The system achieves a high level of interactivity thanks to the built in digital signage software.

The indoor Eye-Points® are available for flat panel displays from 40" to 65" in both portrait and landscape orientation and are equipped with:

- Lockable castors
- Safety glass front
- Swivelling flat panel arm for easy equipment access

FOD-60HBD product explanation

Outdoor display suitable for 2 pieces 60" high brightness screens. Both display sides back to back installed and are accessible through the locked upper hinged glass doors.

Ceiling mounts

for projectors

The projector is not only important element in a professional installation.

Features such as fast installation, easy adjustment and stability of any accessories are just as important.

Audipack®

It's great to have solutions...

Ultimate flexibility

with Audipack ceiling mounts

Quatro-Fix®, the allrounder

The Quatro-Fix projector mounts offers maximum flexibility to set up any projector up to 20kg within the most complex of installs. The Quatro-Fix® ceiling mounts and the brand compatible mounts are equipped with a special newly designed ball joint that allows you to position the projector with minimal effort. The ball joint is designed to rotate from its own point of gravity. This results in a flexible and almost friction free adjustment capability.

UTS, for projector mounts and more.

Audipack also offers brand compatible projector mounts combined with the UTS (**U**niversal **T**ube **S**et) for any brand or type of projector, from stock. Brand compatible mounts are always a perfect fit and comply with manufacturers' installation guides and standards. For this type of ceiling mount an additional projector or camera mount is needed to complete the set.

UTS + brand related mount = the perfect solution

The **heavy duty** universal ceiling mount is a TÜV certified rigid and strong ceiling mount suited for suspending projectors up to 70 kg from the ceiling. The ceiling mount is standard equipped with the patented Audipack ball-joint, which features the unique possibility **to line out** the projector to the projection screen. De cable-outlets enable a neat and safe installation of all the necessary connections.

The **Quick Release** ceiling mounts are ergonomic solutions especially designed for rental and stage use. The special releasable ball joint allows the projector up to 50 kg to be **installed quickly without any tools**. The ingenious construction releases the ball joint adjustment and makes swapping and positioning the projector easy.

The **Quick Release Plus** projector ceiling mounts are ergonomic solutions designed for rental and stage use. The special releasable ball joint allows the projector up to 50 kg to be **installed quickly without any tools**. The ingenious construction releases the ball joint adjustment and makes swapping and positioning the projector easy.

The Plus version has an additional adjustment platform with **3 adjustment knobs**, with which the projector position can be adjusted highly accurate. Ideal for those who use more than 1 projector in one and the same set up!

Projector mount

for **vertical** positioning

An elegant and rigid solution for installing projectors to the ceiling, with the minimalistic design well known from the 800 series product line.

This mount is specially designed for projectors with a special lens that allow a vertical installation.

The ceiling mount is equipped with features to line out the projector to the projection screen. De cable management system in the tube enables a neat and safe installation of all the necessary connections.

The mounting interface has a square 90 mm pattern on which the projector can be mounted with additional cams **392618** for an easy installation without tools.

- ▲ **Slim and minimalistic design**
- ▲ **Easy cable management**
- ▲ **Available in many sizes**
- ▲ **Adjustable in height**

Stack- and rigging frames

for projectors

The Audipack stack and rigging frames

a sturdy solution to meet your needs

Audipack®

It's great to have solutions...

A **NEW** view on **projector rigging and stacking**

The Audipack PSF stack frame series is the safest way for handling a projector in rental and staging applications.

Audipack has developed a special lightweight frame that fits the projector like a glove. The strong, aluminium, light weight construction gives a good grip for lifting, table installation or installing the frame and projector to a truss.

The projector is fitted to the bottom frame on adjustable axes, which allow the projector to be lined up to the screen with high accuracy. Multiple frames can be easily connected and stacked for high output projection. The PSF stack-frames are available in standard sizes, and are also available in custom sizes on request.

- ▲ **New and modern design**
- ▲ **Lightweight 50 mm tubular construction**
- ▲ **Easy to adapt to any projector brand and type**
- ▲ **Integrated fine tune 3D adjustment**
- ▲ **Rotating mounting points for flying installation**
- ▲ **T-Slot mounting in tubes for accessory installation**
- ▲ **5 times overload Safety factor**
- ▲ **Custom models available on request**

Projector housings

custom-made for any projector

Audipack designs housings for projectors

for all kind of situations; silencing, theft-delay, protection against outdoor weather, indoor conditions or airborne dust.

Audipack®

It's great to have solutions...

Projector housings, because your projector

must deliver under any circumstances ...

- ▲ **Protection of your projector**
- ▲ **Custom build**
- ▲ **Easy to install**
- ▲ **Easy access for service and maintenance**

Custom-made projector housings

Audipack projector housings are custom-made, because the size and conditions in which projectors are used vary for every situation. Housings to reduce noise or housings for outdoor projection requires different techniques. To ensure your projector works perfectly under the given conditions, we design a housing specially for your projector and situation.

Outdoor housings

Outdoor housings allows a large screen projector to be installed outside, 24/7. The housing is mainly made of aluminium with an outdoor coating and galvanised parts. The projector is placed on a slide, to draw it out easily of the housing for service and maintenance.

A powerful ventilation/cooling system removes warm air from the housing and blows cooled air over the projector and lens. Internal condensation is reduced thanks to a thermostatically controlled heating and active ventilation system, combined with self regulating (optional) air-conditioning. A double roof construction gives additional protection against extreme sun radiation.

'Open Air' indoor theft delay housings

Audipack's durable open air housings are the ideal solution for indoor installations and secure protection of a projector. The projector can easily be reached for service, without the use of tools. Steel pins can be placed in five different positions, ensuring that the lens is never obstructed. A special cover on top of the housing protects the disk locks from being removed or unlocked. By adding the optional extension platform the projector slides out of the housing for fast maintenance.

Custom made for any projector

Silencing Flightcase model

Silencing Projectline "furniture" model

Silencing housings

Projectors produce noise. In some situations too much noise is not acceptable. A Silencing housing is a perfect solution to solve the problem.

Gain maximum result of your projector in any application. Special adapted airflow and ventilation make sure the projector inhales fresh air and exhausts the hot air. In this way the best balance between sound insulation and ventilation has been reached at low costs. The Silencer is equipped with special fans and a special projection glass window in front of the projector lens. The housing reduces audible noise by approx. 16 – 20 dBA. It is suitable for inside use only and is available in the standard colours black, white or grey. Other colours are available on request. The projector is mounted with a standard Audipack projector mount in the silencer.

Please visit our product wizard on www.audipack.com for an updated model list.

Projector housings,

to ensure branding and special effects

Projectors are more often used outdoors for branding and special effects on buildings and for events.

Audipack has a lot of experience in building protective housings. We custom-build them for many projector brands and types. Our technicians can tell you what is necessary in your situation.

Indoor events

Theaters, museums and many other events use projectors for projection of images and special effects. Audipack's Silencers ensures that visitors enjoy the show without disturbing noise.

All silencing projector housings are tested to check the noise reduction. You receive a full report of the testing results.

Ceiling lift systems

for projectors

Integration of projectors into the ceiling

For example, in a board room, home cinema, auditorium or conference hall

The interior finish looks more streamlined with the projector out of sight – and the equipment is more secure

The solution for **integrating** projectors in **ceilings**

The Audipack projector lift systems have a reputation as durable systems for lowering a projector from the ceiling.

These ceiling lift systems are the perfect solution for integrating projectors into ceilings in board rooms, home cinemas, auditoriums and conference halls. Not only does the interior look better but the projector is less prone to theft.

Well-made and safe, the Audipack ceiling lift system requires little maintenance. With each use, the lift moves precisely to its pre-set position, every time. You can be confident that the projected image will centre perfectly on the screen.

3rd service position (Various lift systems are supplied with this feature)
With the 3rd service position it is possible to let the projector run through the maximum length.

This length is determined by the number of scissors that the lift is provided.

1 - Stored position 2 - Presentation position 3 - Service position

- ▲ **Durable build**
- ▲ **Low maintenance**
- ▲ **Quick installation**
- ▲ **Low noise engine**

SPACER FRAME

With large internal spacings between the structural ceiling and false ceiling, it is better to use a spacer frame to position your Audipack product just above the false ceiling.

Installing your product with long windings or rods ends up in an unstable and flexible set-up. Using the spacer frame prevents choosing large lift systems with long travels and saves costs at the end.

Pulley service lift systems

for projectors

Integrate a projector in the ceiling,

for example, in a board room, auditorium or conference hall.

These lift systems are especially designed to lower projectors from the ceiling for fast maintenance in a safe and controlled manner.

Audipack®

It's great to have solutions...

Bring projectors to **service** height

in **10** minutes...

storage position

projection position

service position

Save time and money by using the Audipack pulley lift systems

These lift systems are especially designed to lower projectors from the ceiling for fast maintenance in a safe and controlled manner.

The projector receives power and data signals through special connectors, which are disconnected when it is lowered and which restore contact when the lift is fully retracted. You can even connect HD signals with the standard supplied connector sets.

Pulley lifts are equipped with safety hooks to secure the projector in the retracted position. The projector will return to this exact position in the ceiling thanks to four centring points on the lift, ensuring the correct position of the projected image.

All this contributes to a safer, more flexible way of presenting and servicing.

The combination lift systems are available as standard in two models, in different sizes and lifting capacities.

An Audipack projector mount is needed to fix the projector to the system.

Note:

For distribution HD signal use standard available

"long distance HDMI twisted pair extender" solutions!

Mirror-Kit systems

for projectors

Mirror-Kit systems for projectors

For the integration of projectors in the ceiling,

for example in the board room, home cinema, auditorium or conference hall.

The interior finish looks more streamlined with the projector out of sight – and the noise is reduced

Integration of a projector

into the Ceiling...

or in a cabinet or table, so that the projector is out of sight and less audible!

The Mirror-Kit is a practical and durable solution for the integration of a projector into the ceiling. For example in a boardroom, home cinema, auditorium or conference hall.

The projector is fixed permanently above the ceiling, resulting in less noise to detract from the presentation and invisibility of the projector.

Audipack Mirror-Kits are available in various dimensions and versions. They are available in dynamic (motorised) and static (non-motorised) versions.

How does it work

The Mirror-Kit works like a periscope. The projected image from the projector is deflected by two highly reflective mirrors onto the projection screen. The larger, lower mirror is motorised and can be activated by a general control system.

- ▲ **Motorized table and ceiling versions**
- ▲ **Static ceiling versions**
- ▲ **Quick installation**
- ▲ **Low noise engine**

Liftomatic[®] rental systems

for projectors

Above the crowd - with the Audipack Liftomatic[®]

Audipack[®]

It's great to have solutions...

Ease of *transport*,

ease of *Presentation!*

Liftomatics are the ideal all-in-one solution for transporting, lifting and presenting.

The only effort required is to remove the lid and connect the Liftomatic to a power outlet. The integrated lift raises the projector to its presentation position.

Using the Liftomatic reduces the risk of personal injury and equipment damage, as well as the time needed for installation. The integrated electric platform tilt mechanism allows the projector to be lined up perfectly with the projection screen.

- ▲ **Anti pinching security device**
- ▲ **Electric platform angle adjustment**
- ▲ **Low maintenance**
- ▲ **Supplied with rigid brake/swivel castors**

Integrated stabilizer

Rota-Kit[®]

rotates your projector

The Rota-Kit,

*helps you position your projector in any direction with
just one push of a button*

Audipack[®]

It's great to have solutions...

Rotate your projector

in every direction

Turn any room into a multi-functional space by rotating your projector.

Rota-Kit is an electric rotating system with 4 freely reprogrammable pre-set positions.

A contact control allows the projector to be rotated to one of the four preset positions, for flexibility of the projection direction.

The Rota-Kit comes in three standard versions, with different tube lengths.

- ▲ **Accurate repositioning**
- ▲ **Compact system dimensions**
- ▲ **Slow start and slow stop motion**
- ▲ **Available in several lengths**

ACCESSORIES

To control the system other than through relay contact:

Ref. 260214 (Internal IR remote control set, 2 positions)

Ref. 260215 (Internal RF remote control set, 2 positions)

Ref. 261227 (External IR remote control set, 4 positions)

Ref. 261228 (External RF remote control set, 4 positions)

Ref. P3630

Installation aid for accurate installation
Also suitable for metal supported ceilings

To install your projector to an Audipack product an additional projector mount is needed.

See "Projector mounts" section on page 121 for an overview of the available projector mounts.

Tablet

housings

Tablet housings,

a smart solution for digital signage, POS and interactive communication with customers

Audipack®

It's great to have solutions...

Tablets in public places

and in *rental* applications

Tablets are more often used for digital signage, POS and interactive communication with customers.

Audipack offers standard and custom-made anti-theft tablet casings for all brands and versions. It is the perfect way to cover, finish and protect tablets in public places and retail outlets.

The Audipack solutions provide both a standard and customisable display that can be installed in various environments. Install it directly into the wall or have it free standing on the floor, for example in car showrooms or stores. The quality high-grade finishing gives this product a luxury appearance.

A modern design combined with practical elements; the tablet, including power cable, is completely concealed in the casing and Wi-Fi accessible.

It's great to have solutions.

Transport- and Flightcases

Audipack specialises in manufacturing transport and flight cases for all kinds of products.

For rental and staging, endurance sports, events or personal use. Large flat panel, LED walls and other audio visual equipment, sales representative demo sets or professional racing teams. Anything is possible.

FLIGHTCASES
MOERKAPELLE
HOLLAND
Audipack® TEL +31(0)78 9831671

Audipack®

It's great to have solutions...

Audipack - the No.1

flightcase manufacturer

All Audipack flight cases are custom made and are available as a one off or series production.

Special features such as motorised or hydraulic lift systems and shock absorbers can be integrated into cases, which can even be made water resistant if required. All cases can be finished in specific colours with special graphics or logos to reinforce a corporate image.

The interior of a transport or flight case is one of the most important factors for the safe transport of your product. The ease of inserting and removing the item from the case is essential to its ergonomics. Audipack is an expert in creating advanced interiors. Audipack interiors are used in our own cases but can also be used in other case shells.

For the AV market Audipack has a vast range of case designs for all brands of flat panel, projectors, mixers and other equipment.

Flight and transport cases can be designed to your precise requirements, and to match other Audipack accessories. Audipack is unique in offering several different types of custom-made flight and transport cases.

Flightcase for 105 inch curved screen

Front loader flightcase for floor stands 700 and 900 series

PACKER®

The Packer is the top of the range in small, ultra-light, custom made portable cases. The perfect solution for transportation, presentation and demonstration of fragile or valuable products.

Max. load 8 kg
 Available as transport case
 Panel thickness 4 mm

TOPLINE®

The TOPLINE is a light and stylish case and offers the strength and durability normally associated with a conventional transport- and flightcase.

Max. load 35 kg
 Available as transport- and flightcase
 Panel thickness 7 mm

SOLID FRAME SF7

The SF7 also known as the Solid frame 7 is comparable with the construction method of the Topline Flightcase only suited with metal corner parts and finishings.

Max. load 35 kg
 Available as transport- and flightcase
 Panel thickness 7 mm

HEAVY DUTY FLIGHTCASES

This range of flightcases is mainly used in AV rental and pro-audio applications. From LED video walls to high end video camera's; the Audipack heavy duty flightcases stand for their job.

Available as transport- and flightcase
 Panel thickness 7-10-16-19 mm, depends on load

Audipack flightcase colours, samples are available on request

Standard colours

Colours against additional costs

Smooth surface

Mandarine grain surface

The structure of the colour laminates is smooth.

Black and dark grey are available in smooth and mandarine grain versions.

There are several options for supporting corporate identities:

Screening

Audipack offers logo screening onto any size of case. The in-house silk screening process is incorporated into the manufacture of the case. A wide range of colour options, and 3-colour screening per image is available.

Engraving

An alternative way of displaying your company logo or safety symbols is engraving. With a CNC controlled production method, we can engrave directly onto the panels of the case. The advantage of this method is that the engraving is less prone to scratching. Engraving in a coloured finish is available.

Stickers

Audipack also offers custom vinyl stickers and digitally printed logos. Either supply us with the artwork or let us design it for you. From custom graphics to simple warning signs, we have the experience to design and apply with almost limitless design and colour options.

AV Furniture

Audipack has an in-house furniture department

creating everything that offers added value for boardrooms and interiors

Project line **AV furniture**

Audipack Project-Line furniture has been one of Audipack's specialisms for many years.

The Project-Line furniture range is individually designed, exclusively for you. Ideal whether you are looking for a single unique item or decorating the interior of an entire studio. Available as individual pieces or as a series.

Audipack specialises in high-quality commercial, studio and office furniture and can supply boardroom tables, commercial furniture, product displays, lecture stands and much more.

Design, functionality and durability are the main benefits. All furniture is manufactured to your individual taste and style and your requirements are our priority. We will incorporate any suggestions, shapes or designs to meet our customer's expectations.

Combine different facilities and standard or customised Audipack products to create a plug and play product such as furniture with built-in flat panel lift, video conferencing systems, or hideaways.

- ▲ **25 years of experience in furniture manufacturing**
- ▲ **Highly skilled timber craftsmen create custom design furniture of finest quality**
- ▲ **Installation on site can be performed to achieve maximum result.**

Silent series

interpreter booths

The highest ISO standards and requirements as requested by users, have resulted in the Audipack "Silent Series" interpreter booths. The Silent Series consists of three versions, the Silent 6300, the Silent 9300 and 9500 series. All versions are fully transportable in optional flightcases.

Audipack[®]

It's great to have solutions...

The **Silent Series** are

easy and quick to install

For effective interpretation, silence is required.

The best solution is an Audipack interpreter booth.

In developing these booths, Audipack has paid full attention to a number of requirements e.g. flexibility, weight, good looks, high-quality materials, ease of use and durability. The scratch resistant surface combined with anodised aluminium frame, gives an attractive and professional appearance.

The Silent Series are easy and fast to install.

One person can do the job.

All elements and panels are interchangeable, so there is no difficulty in adapting the construction to local conditions. Even the door can be placed on any side. The roof elements are connected to each other in the same way as the wall, resulting in a safe and solid construction.

Silent 9300 and 9500 series interpreter booths comply with the ISO 4043:2016 standard. Silent 6300 complies with ISO 4043:1998.

- ▲ **ISO 4043:2016 (latest version) approved**
- ▲ **Panoramic view windows**
- ▲ **Advanced cable management**
- ▲ **Quick installation**

For more information, ask for our Silent Series brochure.

Specials and Projects

Audipack, designing your special projects

With almost 30 years of experience, Audipack can offer AV project management and project or product consultancy. Our specialist knowledge of product implementation can find you the best solution for any situation.

We will make products especially for you!

Our wide range of modern machinery and skills are at your disposal to create any type of bespoke product or solution.

Audipack®

It's great to have solutions...

AV special project solutions

We will make products especially for you!

Our use of in-house electronics and production methods ensure that products are well built and reliable.

Audipack primarily uses self-designed electronic PCB's to ensure a high level of product control, from simple single motor drives to complex multi-directional products with safety features. We build in a way that allows external engineers to implement connection and control without the need for PLC (programmable logic controller) programming knowledge.

The basic elements of any Audipack solution are:

- ▲ ***Cost efficiency***
- ▲ ***Product durability***
- ▲ ***Top class components***
- ▲ ***User ergonomics***
- ▲ ***Preventing product complexity***
- ▲ ***Product design***
- ▲ ***Product quality***

1.5 Km seamless projection set-up

"An impressive project can only be made with impressive products"

For the city of Lyon, together with a French AV partner, Audipack has created a 1.5 Km seamless projection set-up with amongst 16K lumen projectors.

The specials designed outdoor housing not only protect the expensive and vulnerable projectors, but also protect them from external environmental influences. Together with special designed 3D adjustable ceiling mounts the housings are accurately installed for the best seamless result.

Not to forget the perfect service access for each projector. With a power drill activated drawer the projectors are pulled out under strict control; some projectors are installed under steep angles of more than 30 degrees in 2 or 3 axis.

Pedestrians, cyclists and public transportation travellers are being impressed with a fantastic engineered presentation with beautiful images and impressions.

Back-to-back indoor housings

The standard Audipack product program is always a very good base to start from to create a new one.

With little effort existing product- advantages and know-how can be used to modify the base to a complete new product. With a natural synergy between architects and engineers most sophisticated products are generated and fitted for every unique application.

In this case for museums a double screen solution with door entry keyboard and build-in fire department evacuation panel.

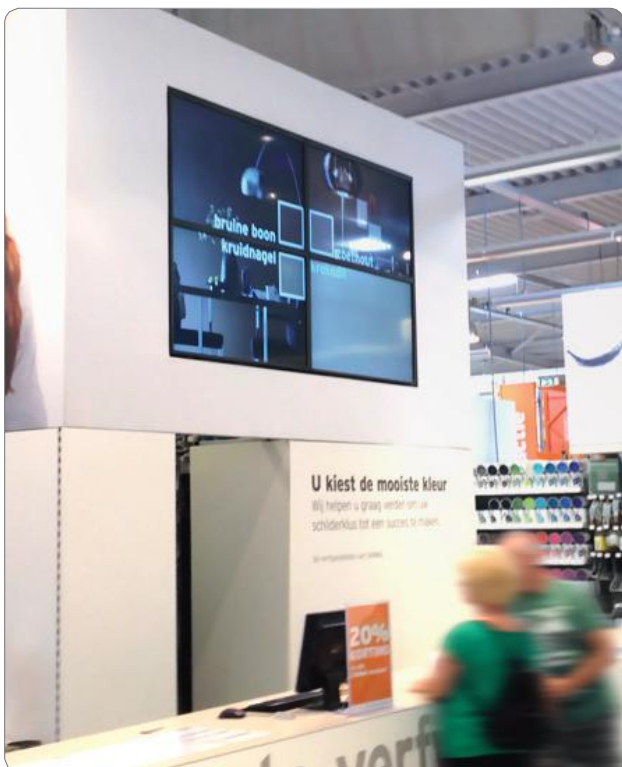

Tamina canyon projection

Audipack and distributor Lang Baranday have advised and manufactured, special outdoor projector casings. The casings were used to install projectors in the Tamina canyon.

The Canyon is created by the water of the Tamina river by splitting the rocks for over 15.000 years. The canyon is a popular place where people can enjoy the Tamina water, which has a temperature of 36.5 degrees Celsius. The water is also being used for wellness purposes. The installed projectors create a unforgettable scene in the rock formation by projecting specials designed images on the rock walls. The purpose of the audio-visual enhancement is attract more visitors and to inform and show the visitors the history and the uses of the Tamina canyon.

Gamma, the largest paint and DIY specialist of the Netherlands

In collaboration with Audipack, Mood Media has transformed all Gamma retail shops into some of the most innovative specialists for paint advice and selection.

Gamma selected Mood Media for the implementation of, among other things, 2 x 2 video walls in all shops. These video walls are used to display commercial content, but also for true colour imaging of colours selected by clients.

For this, Audipack developed a quick to install system that can also easily bring two panels forward for easier access. The Audipack solution included cabinets for the entire video wall to turn the complete system into an easy to install plug-and-play solution.
