

DAVE10G² PORTABLE ACTIVE PA SYSTEM

Small but impressive! With powerful sound and clearly defined mid and high frequencies, the DAVE10 G2 provides a portable sound experience. The compact, very flexible active system has various practical features, including a 5° tilted top hat in the satellites, butterfly handles and an optional castor board. DAVE10 G2 is an ideal tool for entertainers, duos and all smaller PA system and presentation applications, with an excellent price-performance ratio. The DAVE10 G2 active module features all necessary inputs and outputs as well as protective circuits. Transport bags, for the subwoofer and satellites, are also available.

SPECIFICATIONS
