

EWI USB

USB WIND INSTRUMENT

GET EXPRESSIVE. EWI USB is an electronic wind instrument for musicians looking for an easy-to-play, easy-to-use controller. Akai Professional's decades of experience in wind and electronic music instruments are rolled into our most user friendly – and most affordable – EWI ever.

PROFESSIONAL PERFORMANCE

While EWI USB is easy and fun to use, it's also powerful, flexible, and most importantly reliable enough for use on stage and in the studio by professional musicians. Its USB interface means that all you need is nearly any Mac or PC and the included EWI USB software, and you're ready to practice, perform, create, and record with a full collection of wind instrument sounds.

MULTI MODE

EWI USB offers multiple fingering modes including sax, traditional EWI, recorder, and EVI, so whether you're just starting out as a woodwind student or an old pro wind player, you'll find EWI USB easy to play. EWI USB is designed for you to spend your time playing music; not learning technology.

SOUND PALETTE

Because EWI USB is a MIDI controller, it's easy to expand your sound palette. And because EWI USB is a MIDI controller, synthesizer users, producers, and keyboard players will enjoy the expressiveness that it can add to their setups.

Discover the world of expression that only wind instruments can offer with EWI USB.
