

The APart SUBTILE subwoofer is designed to combine a strong, deep bass with a discrete design and small dimensions. It is very easy to integrate even in the most demanding environments. You can use it lying flat on the floor under furniture, hidden under a bench, behind curtains, or wall-mounted using the included brackets. SUBTILE may look like a small heating radiator when mounted to the wall, but instead of heat, it will radiate musical vibes in your room!

SUBTILE is at its best in situations where you want to obtain a full, rich sound without compromising the esthetics of a room. This subwoofer is ideal for use in retail environments (boutiques, fashion stores,...) lounges, bars, restaurants, houses of worship, 5.1 home theater in a living room,...

APart recommends mounting the subwoofer to the wall. Special mounting brackets and a template that helps you to drill the holes are included.

## TECHNICAL SPECIFICATIONS
