

# DENON®

## DENON DCD-900NE

### CD Player with Advanced AL32 Processing Plus and USB

Featuring Advanced AL32 Processing Plus and an integrated USB port, the Denon DCD-900NE CD Player reveals the highest quality audio signals from standard CD and USB sources supporting high-res playback.

#### HIGHLIGHTS

Extended disc, format, and USB support

Advanced AL32 Processing Plus

Designed to reduce vibration and interference

Built to last

DAC Master Clock design

Advanced circuitry with minimized signal paths

Pure Direct mode

Digital outputs

A heritage of audio technology leadership

#### YOUR BENEFITS

The DCD-900NE plays back CD, CD- R/RW, MP3, and WMA formats. Or plug in a USB stick to add playback of FLAC up to 192kHz/24bits or DSD 2.8 MHz/5.6 MHz.

Utilizes data interpolation algorithms, up-sampling, and bit-extension for audio playback that is beautifully faithful to the original sound.

Built with specifically fitted power transformers and increased physical separation between the different audio and digital boards, reducing both vibration and interference.

Backed by a more than 110-year legacy of designing premium audio components, the overall aesthetic, sound quality, and design integrity are built to last.

The precisely crafted master clock design includes a high-quality oscillator to suppress jitter, ensure optimal precision in D/A conversion, and optimizes digital audio circuitry.

The circuit patterns have been engineered to shorten signal paths which reduces interference to reproduce sound that's clean and faithful to the original recording.

Pure Direct mode turns the display and the digital outputs off to minimize interference that might colour the audio signal.

Features one optical and one coaxial digital output to connect to the digital input of an amplifier or AV receiver.

Founded in 1910, Denon has a deep heritage of "firsts" in audio technology. This focused investment in audio R&D ensures you get the latest technology and highest quality with every listening experience.

SINCE 1910 | DEFINING AUDIO EXCELLENCE

**Advanced AL32 Processing Plus**

The latest in analogue waveform reproduction technology, Advanced AL32 Processing Plus utilizes data interpolation algorithms, up-sampling, and bit-extension to support high-resolution audio. The resulting playback is highly detailed, free of interference, richly expressive in the lower range, and beautifully faithful to the original sound.

**Hi-Res Audio Support**

The ability to decode hi-res audio ALAC, FLAC and WAV lossless files up to 24-bit/192-kHz, as well as DSD 2.8MHz and 5.6MHz tracks (the audiophile format of SACD) lets you enjoy each note exactly as the artist intended.

**DAC Master Clock Design**

To accurately synchronize digital circuits, the DAC Master Clock design treats the DAC as the master when clock signals are supplied. Crafted with exceptional quality, the master clock is immediately adjacent to the DAC, which suppresses jitter and ensures optimal precision in D/A conversion.

**Advanced Circuitry**

The circuit patterns have been engineered to make signal paths as short as possible. Shorter circuits reduce interference to reproduce sound that's clean, highly transparent, and faithful to the original recording.

**Pure Direct Mode**

Pure Direct Mode turns the display and the digital outputs off to minimize interference that might color the audio signal. What you hear is clean, detailed, accurate sound.

**Vibration-Resistant Design**

Vibration-resistant design reduces the adverse audio effects of heavy components within hi-fi products so that sound quality meets Denon standards. Power transformers are fitted near the bottom and immediately above the insulators to prevent unwanted vibration. By lowering the transformer, the vibration surrounding the chassis is reduced, resulting in pristine sound.

**110+ Years of First in Audio Technology**

Founded in 1910, Denon has a deep heritage of "firsts" in audio technology—from Japan's first audio electronics manufacturer, to producing the world's first commercial CDs. This focused investment in audio R&D ensures you get the latest technology and highest quality with every listening experience.

Technical Information		
<b>Specifications</b>		
Signal to Noise Ratio	115 dB (CD/USB)	
Frequency Response	USB (PCM/DSD): 2Hz - 50kHz (-3dB) CD: 2Hz - 20kHz	
Total Harmonic Distortion	USB DSD: 0.0015% USB PCM 24-bit: 0.0020% CD: 0.0025%	
Line Level Output	2.2Vms	
DAC IC	ES9018K2M	
Digital Filter	AL32 Processing Plus	
Dynamic Range	101 dB (CD)	
<b>Features</b>		
Advanced AL32 Plus	Yes	
Customized Components	Yes	
CD Compatibility	CD / CD-R/RW / WMA / MP3 / AAC	
<b>Playback</b>		
Program Play (CD)	Yes	
Repeat	Yes	
Random Play	Yes	
<b>USB-A File support</b>	MP3 / WMA / AAC	Yes / Yes / Yes
	WAV	Yes (~192kHz/24bit)
	FLAC	Yes (~192kHz/24bit)
	ALAC	Yes (~96kHz/24bit)
	AIFF	Yes (~196kHz/24bit)
	DSD (DIFF / DSF)	Yes (~5.6MHz)
<b>Others</b>		
Separated rectifier circuit for analog and digital circuitry	Yes	
Display: Dimmer / Off	Yes / Yes	
<b>Ports</b>		
Digital Optical In / Out	No / Yes	
Digital Coaxial In / Out	No / Yes	
Gold-plated Cinch	Yes	
Remote Control Bus In / Out	Yes	
Analogue Out (Cinch)	2Ch	
USB Audio (Front)	Yes	
<b>General</b>		
Metal Front Panel	Aluminium	
Power Consumption	24W	
Standby Consumption	0.3W	
Auto Power Off	Yes	
Remote Control	RC-1246	
Available colours	Premium Silver / Black	
Weight	4.9kg	
Maximum Dimensions (W x D x H)	434 x 328 x 107mm
