## ICON VX1000

L006827

The VX1000 is a powerful video processor that offers an all-in-one solution for driving your big LED screen(s). As the bigger brother to the VX4S-N, it can drive much higher resolutions and more LED screens. It drives up to 6,500,000 pixels in total, at up to 10,240 pixels wide or up to 8,192 pixels high, which is ideal for ultra-wide and ultra-high LED screen applications.
